Discrete Simulation Guy Lee Curry, Bryan L. Deuermeyer, Richard Martin Feldman, 1989 **Proceedings of the 1998 Winter Simulation Conference** D. J. Medeiros, 1998 **Computer Security Journal** , 1990 **Applied Probability and Stochastic Processes** Richard Martin Feldman, Ciriaco Valdez-Flores, 1996 In this book Feldman and Valdez Flores present applied probability and stochastic processes in an elementary but mathematically precise manner with numerous examples and exercises to illustrate the range of engineering and science applications for the concepts The book is designed to give the reader an intuitive understanding of probabilistic reasoning in addition to an understanding of mathematical concepts and principles Unique features of the book include a self contained chapter on simulation Chapter 3 and early introduction of Markov chains Issues in Design/manufacture Integration, 1991 American Society of Mechanical Engineers. Winter Annual Meeting, Andre Sharon, 1991 *Manufacturing Systems Modeling and Analysis* Guy L. Curry, Richard M. Feldman, 2010-11-10 This text presents the practical application of queueing theory results for the design and analysis of manufacturing and production systems This textbook makes accessible to undergraduates and beginning graduates many of the seemingly esoteric results of queueing theory In an effort to apply queueing theory to practical problems there has been considerable research over the previous few decades in developing reasonable approximations of queueing results This text takes full advantage of these results and indicates how to apply queueing approximations for the analysis of manufacturing systems Support is provided through the web site <http://msma.tamu.edu> Students will have access to the answers of odd numbered problems and instructors will be provided with a full solutions manual Excel files when needed for homework and computer programs using Mathematica that can be used to solve homework and develop additional problems or term projects In this second edition a separate appendix dealing with some of the basic event driven simulation concepts has been added **Fundamentals of Management Science** Efraim Turban, Jack R. Masters Theses in the Pure and Applied Sciences Wade H. Shafer, 2012-12-06 *Masters Theses in the Pure and Applied Sciences* was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis CINDAS at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking, we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, *Masters Theses in the Pure and Applied Sciences* has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 29, thesis year 1984, a total of 12,637 theses titles from 23 Canadian and 202 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 29 reports theses submitted in 1984, on occasion certain universities do report theses submitted in previous years but not reported at the time.
