Artificial Humans Manic Machines:

Artificial Humans Rolf Aurich, Wolfgang Jacobsen, Gabriele Jatho, 2000 This study offers a view of fabricated reality from gene technology to virtuality It deals with plagiarisms and their cinematic technological reality and looks at texts from literature and film covering reproduction and artificial intelligence for example R2D2 the Terminator and Lara Croft

Body Utopianism Franziska Bork Petersen, 2022-07-04 This book investigates how desires to transform our bodies can bring utopia to the present and how utopian practices often lead to distinctly dystopian or anti utopian outcomes It is the first comprehensive study to address the paradoxical relationship between bodies and utopianism Franziska Bork Petersen discusses doping bodybuilding and cosmetic surgery alongside practices such as retouching the body as image on social media and looks at how fashion modelling and performance estrange the body Techniques and technologies to transform our bodies are increasingly accessible and suggest an excessive identification of the body as lacking To be a body in a culturally meaningful way we incessantly improve our bodily appearance and capacity The book therefore addresses the utopianism inherent in a cultural understanding of bodies as increasingly controllable *Pop Music and Easy Listening* Stan

Hawkins, 2017-07-05 What defines pop music Why do we consider some styles as easier listening than others Arranged in three parts Aesthetics and Authenticity Groove Sampling and Industry Subjectivity Ethnicity and Politics this collection of essays by a group of international scholars deals with these questions in diverse ways This volume prepares the reader for the debates around pop s intricate historical aesthetic and cultural roots The intellectual perspectives on offer present the interdisciplinary aspects of studying music and spanning more than twenty five years these essays form a snapshot of some of the authorial voices that have shaped the specific subject matter of pop criticism within the broader field of popular music studies A common thread running through these essays is the topic of interpretation and its relation to conceptions of musicality subjectivity and aesthetics The principle aim of this collection is to demonstrate that pop music needs to be evaluated on its own terms within the cultural contexts that make it meaningful **Technophobia!** Daniel

Dinello, 2013-08-26 Techno heaven or techno hell If you believe many scientists working in the emerging fields of twenty first century technology the future is blissfully bright Initially human bodies will be perfected through genetic manipulation and the fusion of human and machine later human beings will completely shed the shackles of pain disease and even death as human minds are downloaded into death free robots whereby they can live forever in a heavenly posthuman existence In this techno utopian future humanity will be saved by the godlike power of technology If you believe the authors of science fiction however posthuman evolution marks the beginning of the end of human freedom values and identity Our dark future will be dominated by mad scientists rampaging robots killer clones and uncontrollable viruses In this timely new book Daniel Dinello examines the dramatic conflict between the techno utopia promised by real world scientists and the techno dystopia predicted by science fiction Organized into chapters devoted to robotics bionics artificial intelligence virtual reality

biotechnology nanotechnology and other significant scientific advancements this book summarizes the current state of each technology while presenting corresponding reactions in science fiction Dinello draws on a rich range of material including films television books and computer games and argues that science fiction functions as a valuable corrective to technological domination countering techno hype and reflecting the weaponized religiously rationalized profit fueled motives of such science By imaging a disastrous future of posthuman techno totalitarianism science fiction encourages us to construct ways to contain new technology and asks its audience perhaps the most important question of the twenty first century is technology out of control *The Vampire in Folklore, History, Literature, Film and Television*, 2015-10-07 This comprehensive bibliography covers writings about vampires and related creatures from the 19th century to the present More than 6 000 entries document the vampire s penetration of Western culture from scholarly discourse to popular culture politics and cook books Sections by topic list works covering various aspects including general sources folklore and history vampires in literature music and art metaphorical vampires and the contemporary vampire community Vampires from film and television from Bela Lugosi s Dracula to Buffy the Vampire Slayer True Blood and the Twilight Saga are well represented

Memories and Monsters Eric R. Severson, David M. Goodman, 2018-01-02 Memories and Monsters explores the nature of the monstrous or uncanny and the way psychological trauma relates to memory and narration This interdisciplinary book works on the borderland between psychology and philosophy drawing from scholars in both fields who have helped mould the burgeoning field of relational psychoanalysis and phenomenological and existential psychology The editors have sought out contributions to this field that speak to the pressing question how are we to attend to and contend with our monsters The authors in this volume examine the ways in which we might best relate to our monsters and how the legacies of ancient traumas and anxieties continue to affect our current stories memories and everyday practices Covering such manifestations of the monstrous as racism crimes against humanity trauma as portrayed in music and art and the Holocaust this book explores the impact the uncanny has on our individual and collective psyches By focusing on a very specific theme and one that excites the imagination Memories and Monsters stokes the flames of an important current movement in relational psychoanalysis It will appeal to psychoanalysts and psychoanalytic psychotherapists as well as professionals in psychology and graduate school students and tutors in the fields of both psychology and philosophy *Filmmuseum Berlin* Wolfgang Jacobsen, Hans Helmut Prinzler, Werner Sudendorf, 2000 [Roddenberry's Faith in Star Trek](#) Bernd Hubert Janzen, 2006
