Heidegger on Art and Art Works J.J. Kockelmans, 1985-04-30 This book grew from a series of lectures presented in 1983 in the context of the Summer Program in Phenomenology at The Pennsylvania State University For these lectures I made use of notes and short essays which I had written between 1978 and 1982 during interdisciplinary seminars on Heidegger's later philosophy in general and on his philosophy of language and art in particular The participants in these seminars consisted of faculty members and graduate students concerned with the sciences the arts literature literary criticism art history art education and philosophy On both occasions I made a special effort to introduce those who did not yet have a specialized knowledge of Heidegger's philosophy to his later way of thinking In this effort I was guided by the conviction that we as a group had to aim for accuracy precision clarity faithfulness and depth while at the same time taking distance comparing Heidegger's views with ideas of other philosophers and thinkers and cultivating a proper sense of criticism Over the years it has become clear to me that among professional philosophers literary critics scholars concerned with art history and art education and scientists from various disciplines there are many who are particularly interested in Heidegger's philosophy of art I have also become convinced that many of these dedicated scholars often have difficulty in understanding Heidegger's lectures on art and art works This is understandable

The Art of Art History Donald Preziosi, 2009-02-26 What is art history Why how and where did it originate and how have its methods changed over time The history of art has been written and rewritten since classical antiquity Since the foundation of the modern discipline of art history in Germany in the late eighteenth century debates about art and its histories have intensified Historians philosophers psychologists and anthropologists among others have changed our notions of what art history has been is and might be This anthology is a guide to understanding art history through critical reading of

the field's most innovative and influential texts focusing on the past two centuries. Each section focuses on a key issue: art as history, aesthetics, form, content, and style; anthropology; meaning and interpretation; authorship and identity; and the phenomenon of globalization. More than thirty readings from writers as diverse as Winckelmann, Kant, Mary Kelly, and Michel Foucault are brought together with editorial introductions to each topic, providing background information, bibliographies, and critical elucidations of the issues at stake. This updated and expanded edition contains sixteen newly included extracts from key thinkers in the history of art, from Giorgio Vasari to Walter Benjamin and Satya Mohanty, a new section on globalization, and also a new concluding essay from Donald Preziosi on the tasks of the art historian today.
