Asa Political Systems The Distribution:

Political Systems and the Distribution of Power Michael Banton,1972 **Measurement and Analysis of Political Systems** Stephen Coleman,1975 The book lays out a mathematical model for collective social and political behavior and tests the model with data from several countries A more recent presentation of the theory is available in the author s book *Popular Delusions How Social Conformity Molds Society and Politics* Political Systems Of The World , *1989 as a Political World Event* Jacques Rupnik,2013-09-24 This book is not about the events of 1989 but about 1989 as a world event Starting with the fall of the Berlin Wall and the collapse of the Soviet bloc it examines the historical significance and the world brought about by 1989 When the Cold War ended in Europe it ushered in a world in which the international agenda is set outside Europe in America or Asia The book critically examines and moves beyond some of the conveniently simple paradigms proposed in the nineties by leading political scientists such as Fukuyama and Huntington to show how the events of 1989 meant different things to different parties This was an anti utopian revolution a symbol of the possibility of non violent transitions to democracy which raised the hopes of world wide democratic changes Contributors show how 1989 can be seen as the founding moment of a globalized world but equal attention should be given to the dispersion of its meanings and the exhaustion of some of its main trends associated with the post 1989 era Europe was reunited yet it is in crisis Twenty years on global markets have brought about a global financial crisis The fall of the Berlin Wall was celebrated as the advent of free movement in a world without borders Now however we can see that new borders walls fences have since been built With an introductory essay by Vaclav Havel 1989 as a Political World Event will be of interest to scholars of European Politics and International Relations *ECONOMICS OF INSTITUTIONS AND LAW* Alessandro Petretto,2017 This book provides a set of lectures for an intermediate course in Public economics devoted to four topics in many elements related each other The first one is the Economics of institutions and political economy as a general framework to analyze the public intervention in modern economies The second one is the Economics of Law which is at the basis of the working of the exchange economy The third one is the Economics of public services enterprises ownership and the fourth one is the Economics of the organization of public administration in providing public services with particular reference to the National health care systems and to the local public municipalities As the standard textbooks in the field usually do not treat within unitary and comprehensive terms these issues the book would provide an attempt in this direction *The Principles of Sociology: pt.1. World Political Systems after Polarity Nerses Kopalyan,2017-06-14 What will the current global political order look like when American unipolarity ends Historically the power configurations of world political systems have been defined by four structures multipolarity tripolarity bipolarity and unipolarity These concepts inform both the formulation and the
