Children In Danger:

Children in Danger James Garbarino, 1992 Childhood is ideally a time of safety marked by freedom from the economic sexual and political demands that later become part of adult life For many children however particularly those who live in our inner cities childhood is increasingly a time of danger The urban war zones of Los Angeles Chicago and Washington D C are not unlike the war zones of Beirut Belfast and Mozambique In both worlds children grow up with firsthand knowledge of terror and violence This book examines the threat to childhood development posed by living amid chronic community violence It shows caregiving adults such as teachers psychologists social workers and counselors how they can work together to help children while they are still children before they become angry aggressive adults Drawing on their extensive fieldwork in war zones around the world the authors explore the link between a child s response to growing up in an atmosphere of violence and danger and the social context established for that child by community and caregivers They reveal the need for establishing predictable structured safe environments for children and they show how school based programs by providing children with the continuity and regularity that is otherwise lacking in their lives can enhance children s natural resilience and help ameliorate some of the long term developmental consequences of living in danger In addition to providing firsthand accounts of how children growing up in an atmosphere of violence address their situations the authors also examine the special concerns that relate to the training and support of teachers who deal not only with the violence in the lives of the children they teach but also with their own personal safety and emotional response to their students traumas

Children in Danger Jean Renvoize, 2023-08-09 In the early 1970s baby battering accounted for an estimated 700 child deaths a year in Britain while a further 4 5 000 children were seriously injured all this in spite of the knowledge gained from the research done both in Britain and in the United States How could such tragedies be prevented What is known about the parents the family patterns and social situations that gave rise to baby battering Extraordinary public interest had been aroused by the appalling case of Maria Colwell and the problem of baby battering was now receiving the close attention it had long warranted Originally published in 1974 Jean Renvoize had spent two years interviewing the battering parents themselves as well as social workers doctors the police and psychiatrists The special virtue of *Children in Danger* was that apart from being the first fully researched book on the subject the author was able to look at baby battering as an outsider seeing the picture as a whole Her overwhelming impression is that although lip service was paid to the idea of cooperation between all professionals working in the field the truth was that too frequently a deep distrust existed between them particularly between social workers and the police The result of this distrust was that every year thousands of children fell through the social welfare net with tragic results Jean Renvoize discusses frankly and impartially the ways the various professions regard each other and she makes constructive suggestions for the future The taped stories of several battering parents which illustrate how narrow

the line is between necessary discipline and near cruelty between extreme exasperation and uncontrolled attack are a moving and illuminating feature of the book These parents talk not only about their lives and the events which led them towards actions they will never cease regretting but also about their views of the help that was given them or the lack of it They are articulate and self aware and here for the first time their story is heard along with the various professional explanations of why some people cannot stop themselves attacking the children whom they long to love **Children in danger** J.
