European Total Defence Gjernmund Forfang Rongved,2025-03-11 This book analyses the origins experiences and challenges of total defence in Europe and comprises a broad spectrum of national case studies as well as one international organisation NATO The topic of total defence has been brought to the fore by deglobalisation augmented international tension the US pivot to Asia grey zone threats Covid 19 and not least by the increased Russian threat during the 2010s which culminated in the invasion of Ukraine in 2022 The analysis here is based on an in depth analysis of the four major Nordic countries the Baltic countries Poland Ukraine Switzerland and the Netherlands as well as a perspective from NATO itself This volume argues that although the activity that we describe as total defence has many labels and various expressions which follow from each country s own history geopolitical setting and strategic culture some aspects of it are to be found in most countries This is because all countries at least to some extent will need their armed forces to rely on civil society in a crisis however it is a long way from this to a full fledged total defence concept With continued international tension the need to build resilient societies and the European need to take more responsibility for its own security in a cost efficient way this book argues that we should expect total defence to gain importance in the 21st century This book will be of much interest to students of security studies defence studies European politics and International Relations in general
