## TEST YOUR DEFENSIVE PLAY!

This book is designed to accompany *Planning in Defense*, Book 10 in the *Bridge Technique* series.

Defending a bridge contract is not an easy business. Not part of the game requires more attention, hard work, and clear thinking. Is it worth the effort? Certainly, if you like to win as often as possible and want to acquire a reputation as a tough player to face. Nevertheless, if bridge were an easy game to play, it would not have such a huge worldwide following.

The basic principles of defending suit contracts are straightforward, but applying them is not always so easy. Don't be surprised that some serious challenges await you in these pages!

**DAVID BIRD** has written more than fifty previous books, including the award-winning *Bridge Technique* series (with Marc Smith), a regular contributor to many British magazines, the *News* (and *Southampton*, England).

**TIM BOURKE** is a world-renowned collector of interesting bridge facts, whose previous books include *Quintessence in Winning Bridge* (with Marc Smith) and *Suits & Spreads* (with David Bird), he lives in Canberra, Australia.

## PLANNING THE DEFENSE AGAINST A SUIT CONTRACT

Were you hoping to buy a book that would show you how easy defense can be? Sorry about that! Even impeccable bridge writers, hoping to promote their books, cannot pretend that there is a set of magic formulae to guide you to the winning defense. Of course there are some excellent general guidelines, taught to beginners. When you are past that stage you have to do two things: you must count and you must think. You count to gather evidence, and you must think in order to determine the best chance of defeating the contract. (This will be the aim throughout this book. Imagine that you are defending at IMPs or rubber bridge, rather than trying to save an overtrick in a matchpoint pairs event.)

Let's look at counting first. What do you count? This is the list:

**High-card points.** If declarer has indicated his point-count range during the auction (by bidding, or passing), you keep a count on the points he shows and deduce what remaining cards he might hold.

**Shape.** As soon as possible, you attempt to gain a 'count of the hand'. This means discovering how many cards each player holds in a suit. The more you play bridge, the more you will appreciate how important this is.
