Defense Economics:

Defense Economics Marcus Matthias Keupp, 2021-05-21 This textbook examines the economic problems of military organizations from an institutional perspective. It discusses the efficiency and effectiveness of military performance using a capability based conceptualization. Constitutional, historical and economic considerations complement the analysis. Neither the analysis nor the conclusions depend on any specific armed force, culture, organization or language. On the contrary, the challenge of defense economics analysis and armed forces management is reduced to a fundamental economic problem and solutions to this problem are offered. This book is a must read for students, scholars and practitioners interested in a better understanding of defense economics. *Handbook of Defense Economics* Keith Hartley, Todd Sandler, 1995. This handbook examines the state of defence economics covering theoretical analysis, econometric techniques and policy issues. The chapters fall into two categories: surveys and conceptual studies.

Defense Economics Gavin Kennedy, 1983. Study of defence economics, defence budgeting and arms procurement in UK, France, Germany, Federal Republic, Canada, USA and USSR. The defence industry's militarism and economics of disarmament includes a literature survey of military expenditure and background economic theory. Examines NATO and selected countries' gross national product and per capita national income. Analyses defence planning, inter-relationship between military institutions and industries supplying military hardware, considers impact of defence spending. Bibliography.

The Economics of Defense Spending United States. Assistant Secretary of Defense (Comptroller), 1972. *Handbook on the Economics of Conflict* Derek L. Braddon, Keith Hartley, 2011-01-01. The Handbook on the Economics of Conflict conveys how economics can contribute to the understanding of conflict in its various dimensions embracing world wars, regional conflicts, terrorism and the role of peacekeeping in conflict prevention. The economics of conflict is a relatively new branch of the discipline of economics. Conflict provides opportunities for applying game theory involving strategic behaviour, interactions and interdependence between adversaries. The Handbook demonstrates that conflict and its prevention is costly; it considers new dimensions such as ethnic cleansing, destructive power, terrorism, corruption, the impact of new technology, peacekeeping, the role of economists in defence ministries and the use of private contractors in conflict.

The Political Economy of Defense Andrew Ross, 1991-07-30. This collective volume identifies the nature of political economy of defense inquiry beyond the traditional two-dimensional analyses of defense economics and defense politics.

The Economics of Defense Todd Sandler, Keith Hartley, 1995-05-18. Defense economics examines both peace and defense issues using such macroeconomic and microeconomic tools as growth theory, static optimization, dynamic optimization, comparative statics, game theory and econometrics. This book provides an up-to-date survey of the field of defense economics, synthesizing and unifying the vast literature in this area. Many aspects of defense, disarmament, conversion and peace are examined. Both demand and supply issues of defense spending are analyzed.

The Economics of Defence Policy Keith Hartley, 2011. Since the end of the Cold War, the world has been faced with

new regional conflicts terrorism and threats from the proliferation of weapons of mass destruction and from rogue states The world remains uncertain unstable and insecure with continued threats to global peace and security The world economic crisis has also threatened government spending with defence as a candidate for spending cuts Choices have to be made about the size of a nation's defence budget its allocation between nuclear and conventional forces between equipment and personnel and between air land and sea forces Major reductions in defence spending and the challenge of maintaining security with increasingly limited resources will confront the defence budgets of all nations This book identifies the typical questions raised by economists when studying defence policy shows how simple economic analysis can be used to answer these questions and provides a critical evaluation of defence policy Controversial and illuminating this pioneering work subjects the myths emotion and special pleading which dominate defence debates to the close scrutiny of economic analysis and critical appraisal It identifies the range of choices facing all governments with examples taken from the UK Europe and the USA This valuable contribution should be of interest to postgraduates and researchers focusing on defence economics as well as those working in the military or defence ministries

Interdisciplinary Economics Wilfred Dolfsma, Stefan

Kesting, 2013-07-18 Kenneth Boulding was a prolific writer across so many different fields that not only is he often much referred to and cited he is considered a core member of many of these fields Boulding is the quintessential interdisciplinary scholar He died in 1993 but he has left a legacy in economics conflict studies systems theory ecology biology communication studies and ethics As an economist proper he has tested and expanded the boundaries of that field without unduly invading and undermining the expertise and established knowledge of the other social sciences This proposed volume will allow scholars who have worked or are starting to work in areas that Boulding has initiated established and made a continued contribution to to understand the links between these fields and other related ones The volume will establish a source of inspiration for some time to come

Research Methods in Defence Studies Delphine Deschaux-Dutard, 2020-08-09 This textbook provides an overview of qualitative and quantitative methods used in different social sciences to investigate defence issues Recently defence issues have become of increasing interest to researchers in the social sciences but they raise specific methodological questions This volume intends to fill a gap in the literature on defence studies by addressing a number of topics not dealt with sufficiently before The contributors offer a range of methodological reflections and tools from various social sciences political science sociology geography history economics and public law for researching defence issues They also address the increasingly important question of data and digitalization The book introduces the added value of quantitative and qualitative methods and calls for a cross fertilization of methods in order to facilitate better research on defence topics and to fully grasp the complexity of defence in the 21st century This book will be of much interest to students researchers and practitioners of defence studies war studies military studies and social science research methods in general

Economic Growth, Prosperity and Sustainability in the Economies of the Balkans and Eastern European

Countries Maria Mavri, Patricia Ikouta Mazza, Anastasios Karasavoglou, Persefoni Polychronidou, 2024-08-07 This book features a selection of papers presented at the 15th International Conference Economies of the Balkan and Eastern European Countries EBEEC held at the University of the Aegean in Chios Greece May 12 14 2023 The EBEEC conference serves as an annual meeting of policy makers from Eastern European and Balkan countries as well as scientists More than 300 researchers and students attended the conference and presented their work in parallel sessions This volume deals with various aspects of economic growth prosperity and environmental social and economic sustainability of countries in the region in the context of globalization and digitalization It also examines topics such as consumer behavior towards new products and services human capital teleworking the food market international trade and foreign direct investment In turn the book proposes frameworks and solutions to help countries deal with and manage the complex local and global environment

Principles of Economics Fred Manville Taylor, 1920 *Arms Trade and Economic Development* Jurgen Brauer, Paul Dunne, 2004-08-02 Countries that spend scarce resources to import arms from abroad often require arms sellers to reinvest part or all of the proceeds back into the arms importing country These so called arms trade offsets are therefore thought to enhance domestic economic development But does this process actually succeed This book examines the theory and policy applications of arms trade offsets and looks at more than a dozen case studies drawn from across Europe Africa Asia and the Americas The chapters based on original research and published here for the first time are all written by leading experts That an impressive lucid and cohesive volume such as this will interest defence economists can be taken almost for granted The book will also be a useful and enlightening read for those interested in international development economics military studies and policy makers across the globe

The Political Economy of Defense Andrew Ross, 1991-07-30 Beyond the traditional two dimensional analyses of defense economics and defense politics lies a rapidly growing field of research the political economy of defense As the study of the interface between economics politics and defense proliferates this collective volume sets out to identify the nature of political economy of defense inquiry surpassing a narrower focus on the economic consequences of military spending The starting point for this collaborative effort was a series of panel discussions organized by Andrew L Ross in which most of the contributors to this volume participated The majority of chapters were written expressly for this book and have not been previously published These analytical and empirical investigations are intended to illustrate the broad encompassing scope of political economy of defense research and contribute to the development of a research agenda Andrew L Ross has brought together a timely and significant array of inquiry into the impact of defense spending on world politics and global economics This book will be of great interest to political scientists defense specialists and economists studying the military industrial complex

Defence Policy of Nigeria: Capability and Context Charles Quarker Dokubo, Celestine Oyom Bassey, 2011-01-20 This Reader provides a structurally coherent explanation and review of the magnified role conception and organizational task expansion for the Nigerian military establishment in foreign policy It

argues essentially that one of the most problematic and intractable areas of public policy in Nigeria since the Civil War concerns the development of a professional defence establishment adequate to meet the challenges arising from the altered parameters of our security environment. The correction of this condition is the primary motivation of the Armed Forces modernization and augmentation program that touches upon all elements of Nigeria's military power. This Reader is at once a review and a critique of the major facets of this modernization and augmentation process of the Nigerian armed forces within the operative context of the changing dimension of threat perception and the strategic parameters that have guided Nigerian military planning since the Civil War in 1970.

Elements of Defense Economics Charles Johnston Hitch, 1977

The Economics of Producing Defense Yaacov Lifshitz, 2012-12-06

The Economics of Producing Defense Illustrated by the Israeli Case begins with an overview of the development of defense economics as a sub discipline of the general theory of economics and points at the new challenges it is facing in the post Cold War era. It focuses then on the supply side of defense economics presenting theoretical analyses and empirical findings related to the use of various inputs: manpower domestically made defense products imported arms in providing national security. Most of the issues under discussion are further elucidated by examples from Israel's experience. As a small economy that faces continuously severe security problems, Israel's way of coping with defense economic issues may indeed forward some interesting lessons for a wider audience. The principal aim of the book is to convince policy makers and the public at large of the contribution defense economics could make to more effective management of national security problems. This aim is encouraged by the growing weight attached to economic considerations and consequences in producing and supplying defense as demonstrated in the detailed discussion.

Elements of Defense Economics United States. Joint Chiefs of Staff, 1967

Economizing Defense Thomas Kelly Duncan, 2013

The military industrial complex has long been an economic and political factor in the U.S. economy. The amount of resources fed into this war machine is staggering. Since World War II the U.S. has continuously spent vast sums on the military, creating what has been termed a permanent war economy. Even in times of peace the armed forces are kept in a state of readiness under the auspices of foreign threats or the need to protect the industrial base. This continued preparedness begs two central questions: 1. what is the proper size and scope of the military and 2. what is the institutional arrangement under which we can be assured of achieving that proper size and scope. This dissertation addresses these questions, extending the literature on defense optimality and the institutional arrangements of national defense in the U.S. The first essay considers the concept of national defense as a public good, which is the common reasoning for state provision of defense, and suggests that the optimal level of defense can be provided by the market. The second essay explores the institutional arrangement that has arisen in the United States, namely the military industrial complex and its permanent war economy, and the costs that result from the top-down approach to defense contracting. The third essay examines the way that institutional arrangement originated from the central planning of the New Deal and World War II and argues that today's

permanent war economy is a function of the vested interests that arose via state management of those crises
