Deindustrialization And Plant Closure:

Deindustrialization and Plant Closure Paul D. Staudohar, Holly E. Brown, 1987 Contains a collection of readings on the debate over deindustrialisation and plant closure as an inevitable consequence of continual industrial restructuring

Plant Closings Francis A. O'Connell, **Global Production and Domestic Decay** Brian D. Phillips, 2021-12-12 First Published in 1942 Phillips has written an important study covering three areas theoretical empirical and public policy This book explores some of the explanations for and consequences of globalized production by transnational corporations A review of the theoretical underpinnings of the reasons for corporate overseas expansion precedes a discussion of transnational corporation overseas production facilities The literature reviewed supports the position that the exodus of manufacturing capital has been assisted by state policy which has encouraged capital flight and that corporate efforts to downsize manufacturing operations in the United States have added to corporate profitability and championed profits over the strengthening the domestic economy

The Politics of Industrial Closure Steven High, Stefan Berger, 2026-03-24 The Politics of Industrial Closure explores how the political consequences of neoliberal globalization have led to the decline of industrial regions across Western Europe and North America Co editors and historians Steven High and Stefan Berger and the team of contributors depict that deindustrialization and its legacies have long term impacts by diving into its ongoing manifestations and aftermaths With collaboratively written chapters exploring Italy France Germany the United Kingdom the United States and Canada this volume examines the impacts of deindustrialization demonstrating that it is an uneven geographical spatial and temporal process This study transcends the local and regional investigations that often predominate deindustrialization studies and the wider transnational and cross national perspective of this work highlights the ways that geography matters in the deindustrialization process This collection pursues diverse avenues of investigation into deindustrialization in hopes to understand the deep roots of recent universal and political phenomena The Politics of Industrial Closure considers deindustrialization as yet another form of dispossession within global capitalism and seeks to break out of a unitary understanding of the problem of deindustrialization

Government Policy and Industrial Change David Gibbs, 2025-11-21 Government Policy and Industrial Change 1989 seeks to take stock of the recent changes in policy issues in the UK and USA de industrialisation internationalisation technological change and investigates in particular four areas at the cutting edge of policy change It looks at the impact of new technology the role of small firms the service sector and the increase in private sector led initiatives at the local level

A Town Abandoned Steven P. Dandaneau, 1996-01-01 A cultural study of the Flint community s response to its own deindustrialization within the framework of the state national and international forces that produced it

Plant Closure, Regulation, and Liberalism Oren M. Levin-Waldman, 1992 This book is about the problem of plant closure and our failure as a society to formulate an effective solution to the problem The author asks the question why have we as a society been able to regulate any number of economic issues but not this one

Deindustrialization in New York Metropolitan Areas Glenn Yago, 1983 **The Politics of Plant Closings** John Portz, 1990 A paper reprint of the 1988 original It is a political history that describes and analyzes the management of organized knowledge Wheatley takes Flexner and the Carnegie Foundation of 1910 as the model Portz political science Northeastern U combines a synthesis of the literature on urban politics and political economy with a close analysis of plant closings in Pittsburgh Pennsylvania Louisville Kentucky and Waterloo Iowa to illuminate the complexity of constraints upon and range of local government efforts to control the economic damage caused by shutdowns Paper edition unseen 12 95 Annotation copyrighted by Book News Inc Portland OR *The Legal Studies Forum*, 1988 **From Middle Income to Poor** Allison Zippay, 1991-11-21 Allison Zippay charts the decline of displaced blue collar workers part of the fallout of the past decade's dramatic economic shift from manufacturing to an expanded service based economy She challenges the widely

held assumption that these workers have been absorbed into the post industrial economy and raises questions regarding the real nature of their occupational transition Actually a case study of the Shenango Valley in western Pennsylvania where an estimated 6 600 jobs were lost due to plant closings From Middle Income to Poor is unique in its coverage of the vital issue of economic dislocation Zeroing in on long term unemployment and income loss Zippay finds that many of the displaced workers remain unemployed or underemployed and have slipped in status from middle income to poor The volume uses data gathered from interviews to explore how persons with a history of steady blue collar employment have coped with economic dislocation and downward lifestyle shifts and in the process presents a path breaking community portrait of industrial displacement Early chapters focus on blue collar workers in the 1980s and the economic and social dimensions of the manufacturing decline They describe the Shenango Valley community setting mill work mill workers and how the lifestyles of the local residents have been shaped by long standing blue collar traditions Later chapters investigate the changes in income and employment that prompted a downward slide and examine the processes of rebuilding Chapter Seven cites incidences of depression and other emotional distress as well as changes in perception of self and community The final chapter discusses the implications of the findings and recommends actions that could improve the displaced workers social and economic well being Sociologists policy analysts social workers and those in the fields of labor relations social welfare and social economics will find that this intense scrutiny of the Shenango Valley has far reaching implications for the national economy in the 1990s and beyond

Workers' Response to Plant Closures Myrna Cherkoss Donahoe, 1987 [Up Against the Corporate Wall](#) S. Prakash Sethi, 1991 [Southern Economic Journal](#), 1987 Contains section Book reviews [The Rural Midwest Since World War II](#) Joseph Leslie Anderson, 2014 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural

Midwesterners have confronted and created challenges uniquely their own **Managing Decline** Suzanne Culter,1999-05
Industrial restructuring has become a way of life the inevitable accommodation to rapid changes in technology to a global economy that affects large and small communities through the constant flow of goods and people and to the challenging patterns of economic viability that alter that flow **Managing Decline** examines the impact of coal mine closures in Yubari City Hokkaido once one of Japan s most prosperous coal producing cities and asks how Japanese culture has influenced the enactment of and response to industrial policy for restructuring in this community For many years coal formed the backbone of Japan s economic development but the dangers and costs of mining became increasingly expensive for the industry and government Global changes in coal production and exchange finally prompted Japan s decision in 1986 to shut down nearly all domestic coal mines in favor of coal imports Japan s policy for industry restructuring has been applauded as one of the most comprehensive in addressing the needs of the industry the workers and the community At the micro level however the people in the community most affected by the policy decisions have been excluded from the process **Managing Decline** reveals the stratified effects as well as compensation for the different groups in Yubari Although the policy settlement package goes to the coal miners community redevelopment ignores their needs prompting them to leave the city and benefiting instead land owners and public employees Revealed as well as the ways in which Japan s cultural values particularly the vertical social structure as it affects decision making status occupations and company organization and the importance of maintaining the family system figure in the policy process and its consequences The author s research based on two years residence in Yubari during the last few years of the closures makes an important contribution to community studies of social change in Japan It is also the first field study to examine the effects of industrial policy for restructuring in Japan at the worker and community level **From Columbus to ConAgra** Alessandro Bonanno,1994 This examination of the role of agriculture and food in the new international division of labor argues that the globalized economy creates new winners and losers
