Democracy Development Distortion:

The Political Economy of Agricultural Price Distortions Kym Anderson, 2010-08-30 Despite numerous policy reforms since the 1980s farm product prices remain heavily distorted in both high income and developing countries This book seeks to improve our understanding of why societies adopted these policies and why some but not other countries have undertaken reforms Drawing on recent developments in political economy theories and in the generation of empirical measures of the extent of price distortions the present volume provides both analytical narratives of the historical origins of agricultural protectionism in various parts of the world and a set of political econometric analyses aimed at explaining the patterns of distortions that have emerged over the past five decades These new studies shed much light on the forces affecting incentives and those facing farmers in the course of national and global economic and political development They also show how those distortions might change in the future

Developing Areas Vijayan Pillai, Lyle Shannon, 2024-11-01 With subjects ranging from the global challenge of the AIDS epidemic to the role of family planning in developing nations and the link between Central America's forests and North America's hamburgers this interdisciplinary introduction by some of the world's foremost experts in development studies will be an essential text for courses in this area It provides an exhaustive overview of the social political economic and population problems of countries in what is usually referred to as the Third World and more recently the Fourth World Although colonialism is considered as a contributing factor to underdevelopment emphasis in this volume is placed on the interrelation of major social institutions their impact on economic and social development and the effect of rapidly expanding industrialization on the ecosystem
