Demographic Dynamics in America Wilbur Joseph Cohen, Charles F. Westhoff, 1977 *Demographic Dynamics in America* Wilbur Joseph Cohen, Charles F. Westhoff, 1977 Demographic Dynamics of the U.S.-Mexico Border John Robert Weeks, Roberto Ham Chande, 1992 **The Routledge History of Modern Latin American Migration** Andreas E. Feldmann, Xochitl Bada, Jorge Durand, Stephanie Schütze, 2022-10-26 The Routledge History of Modern Latin American Migration offers a systematic account of population movements to and from the region over the last 150 years spanning from the massive transoceanic migration of the 1870s to contemporary intraregional and transnational movements The volume introduces the migratory trajectories of Latin American populations as a complex web of transnational movements linking origin transit and receiving countries It showcases the historical mobility dynamics of different national groups including Arab Asian African European and indigenous migration and their divergent international trajectories within existing migration systems in the Western Hemisphere including South America the Caribbean and Mesoamerica The contributors explore some of the main causes for migration including wars economic dislocation social immobility environmental degradation repression and violence Multiple case studies address critical contemporary topics such as the Venezuelan exodus Central American migrant caravans environmental migration indigenous and gender migration migrant religiosity transit and return migration urban labor markets internal displacement the nexus between organized crime and forced migration the role of social media and new communication technologies and the effects of the COVID 19 pandemic on movement These essays provide a comprehensive map of the historical evolution of migration in Latin America and contribute to define future challenges in migration studies in the region This book will be of interest to scholars of Latin American and Migration Studies in the disciplines of history sociology political science anthropology and geography

Stochastic Population Dynamics in Ecology and Conservation Russell Lande, Steinar Engen, Bernt-Erik Sæther, 2003 All populations fluctuate stochastically creating a risk of extinction that does not exist in deterministic models with fundamental consequences for both pure and applied ecology This book provides the most comprehensive introduction to stochastic population dynamics combining classical background material with a variety of modern approaches including new and previously unpublished results by the authors illustrated with examples from bird and mammal populations and insect communities Demographic and environmental stochasticity are introduced with statistical methods for estimating them from field data The long run growth rate of a population is explained and extended to include age structure with both demographic and environmental stochasticity Diffusion approximations facilitate the analysis of extinction dynamics and the duration of the final decline Methods are developed for estimating delayed density dependence from population time series using life history data Metapopulation viability and the spatial scale of population fluctuations and extinction risk are analyzed Stochastic dynamics and statistical uncertainty in population parameters are incorporated in Population Viability Analysis

and strategies for sustainable harvesting Statistics of species diversity measures and species abundance distributions are described with implications for rapid assessments of biodiversity and methods are developed for partitioning species diversity into additive components Analysis of the stochastic dynamics of a tropical butterfly community in space and time indicates that most of the variance in the species abundance distribution is due to ecological heterogeneity among species so that real communities are far from neutral
