Antenna Toolkit:

Antenna Toolkit Joseph Carr, Joe Carr, 2001-09-11 Joe Carr has provided radio amateurs and short wave listeners with the definitive design guide for sending and receiving radio signals with Antenna Toolkit 2nd edition Together with the powerful suite of CD software the reader will have a complete solution for constructing or using an antenna bar the actual hardware The software provides a simple Windows based aid to carrying out the design calculations at the heart of successful antenna design All the user needs to do is select the antenna type and set the frequency a much more fun and less error prone method than using a conventional calculator to solve formulae The new edition has been revised to include further cases of propagation additional antennas and also two new chapters Small Loop Antennas a topic of considerable interest which has been the subject of much recent debate in the amateur radio press and Yagi Beam Antennas widely used at HF and VHF The CD software has also been updated Joe Carr s expertise in the area of antenna design is legendary Antenna designers whether hobbyist or technician can be assured they need look no further than Antenna Toolkit for the complete guide to understanding the practicalities of using and designing antennas today A complete solution for antenna design in one package Includes free CD ROM with state of the art software for all design calculations The definitive guide to antenna design for radio amateurs and short wave listeners

Antenna Toolkit Joseph J. Carr, 2014-05-14 Preface Radio signals on the move Antenna basics Wire connection grounds Marconi and other unbalanced antennas Doublets dipoles and other Hertzian antennas Limited space antennas Large loop antennas Wire array antennas Small loop antennas Yagi beam antennas Impedance matching Simple antenna instrumentation and measurements Getting a good ground Index

Antenna Theory and Design Warren L. Stutzman, Gary A. Thiele, 2012-05-22 Stutzman s 3rd edition of Antenna Theory and Design provides a more pedagogical approach with a greater emphasis on computational methods New features include additional modern material to make the text more exciting and relevant to practicing engineers new chapters on systems low profile elements and base station antennas organizational changes to improve understanding more details to selected important topics such as microstrip antennas and arrays and expanded measurements topic *Co-simulations of Microwave Circuits and High-Frequency Electromagnetic Fields* Mei Song Tong, Xiao Yu Li, 2024-07-03 This book aims to provide many advanced application topics for microwave circuits and high frequency electromagnetic EM fields by using advanced design system ADS and high frequency structure simulator HFSS as simulation platforms In particular it contains the latest multidisciplinary co simulation guidance on the design of relevant components and devices Currently the circuit field design and performance analysis and optimization strongly rely on various kinds of robust electronic design automation EDA software RF microwave engineers must grasp two or more types of related simulation design software ADS by Keysight and HFSS by Ansys are the representative for circuit simulations and for field and structural simulations of microwave devices respectively At present these two types of software are widely used in enterprises universities and research institutions The

main purpose of this book is to enable readers who are interested in microwave engineering and applied electromagnetics to master the applications of these two tools It also helps readers expand their knowledge boundaries behind those types of software and deepen their understanding of developing interdisciplinary technologies by co simulations The book is divided into three parts The first part introduces the two latest versions of ADS and HFSS and helps readers better understand the basic principles and latest functions better It also advises how to choose appropriate simulation tools for different problems The second part mainly describes co simulations for high frequency EM fields microwave circuits antenna designs EM compatibility EMC and thermal and structural analyses It provides guides and advices on performing co simulations by ADS and HFSS incorporated with other types of software respectively The last part narrates the automation interfaces and script programming methods for co simulations It primarily deals with the Advanced Extension Language AEL Python Data Link PDL and MATLAB interface in ADS For HFSS it discusses VBScript IronPython scripting and Application Programming Interface APIs based on MATLAB Each topic contains practical examples to help readers understand so that they can gain a solid knowledge and skills regarding automated interfaces and scripting methods based on these kinds of software Concisely written in combination with practical examples this book is very suitable as a textbook in introductory courses on microwave circuit and EM simulations and also as a supplementary textbook in many courses on electronics microwave engineering communication engineering and related fields As well it can serve as a reference book for microwave engineers and researchers
