The History of Chinese Buddhist Bibliography: Censorship and Transformation of the Tripitaka Tanya Storch, 2014-03-25 This clearly organized well researched book on the medieval catalogs of Buddhist writings in China illuminates the shaky foundations of modern Buddhist research Storch exposes how the Chinese Buddhist corpus was shaped and even censored by generations of catalogers the guardians of the canon At the same time Storch probes the catalogs for what they reveal about standards of authenticity the assignment of value to some scriptures over others and the history of books libraries and learning in pre modern China Moreover Storch argues convincingly that the history of Chinese Buddhist catalogs should be incorporated into comparative discussions of scripture and canon in world history As the first general study of Chinese Buddhist bibliography in English by an author who demonstrates a thorough command of the material this book is the first place scholars should turn to for information about the structure and formation of the Chinese Buddhist canon This book deserves a place on the bookshelf of every specialist in pre modern Chinese Korean and Japanese Buddhism John Kieschnick Stanford University This volume brings forward the

importance of the cataloging of the many versions of the Chinese Buddhist canon Given that these compilations are the source for much of the written history of Buddhism in East Asia they deserve the careful study that has been given to them by Tanya Storch in this book Her research advances the understanding and provides much new data about this genre of literature and its impact on Chinese religion and culture Lewis Lancaster University of California Berkeley Offers insight into wide ranging issues of how religious ideas are transmitted between cultures Although the focus here is on the ways in which Buddhism in both oral and written forms was assimilated into Chinese literary society Storch s comparative approach will also be of interest to scholars specializing in the comparative analysis of sacred scriptures E Ann Matter University of Pennsylvania Cataloging is an essential step toward canon formation in East Asian Buddhism However current scholarship has not yet revealed the mysteries behind the collection of the enormous corpus of Buddhist texts which is called the Buddhist canon let alone the process of catalog making Dr Storch s work is pioneering in this direction and touches the core of the rich textual tradition in East Asian Buddhism In addition her meaningful contribution will be of interest to researchers of a global history of scriptural catalogs because she brings in a comparative perspective to the subject matter and puts the Chinese Buddhist catalogs on a par with the Confucian textual tradition and Western cataloging practices This book is highly recommended for scholars and students studying Buddhism history of the Chinese book and comparative religion Jiang Wu University of Arizona This highly accessible book is not only helpful to the nonspecialists in Buddhism but also to Buddhist scholars who are interested in how and why differing versions of the Buddhist canon came into existence Much Buddhist sectarianism stems from different assessments of what should be counted as a reliable Buddhist scripture This account of the long and complex history of Chinese Buddhist ideas about what should be included in a catalogue of authentic Buddhist scriptures sheds much light on the process of canon formation in Buddhism It also demonstrates that Chinese Buddhists played a leading role in dividing Buddhism into so called Hinayana and Mahayana which is at the root of much Buddhist sectarianism Rita M Gross University of Wisconsin Eau Claire *Postcolonial Biblical Criticism* Fernando F. Segovia, Stephen D. Moore, 2007-02-14 Postcolonial studies have made significant inroads into biblical studies giving rise to numerous conference papers articles essays and books This book offers an introduction to postcolonial biblical criticism and probes it from a number of different but interrelated angles to bring it into focus so that its promise can be better appreciated [American Transcendentalism and Asian Religions](#) Arthur Versluis, 1993 Arthur Versluis offers a comprehensive study of the relationship between the American Transcendentalists and Asian religions He argues that an influx of new information about these religions shook nineteenth century American religious consciousness to the core With the publication of ever more material on Buddhism Hinduism and Taoism the Judeo Christian tradition was inevitably placed as just one among a number of religious traditions Fundamentalists and conservatives denounced this influx as a threat but the Transcendentalists embraced it poring over the sacred books of Asia to extract ethical injunctions admonitions to self
