Possible Minds John Brockman, 2019-02-19 Science world luminary John Brockman assembles twenty five of the most important scientific minds people who have been thinking about the field artificial intelligence for most of their careers for an unparalleled round table examination about mind thinking intelligence and what it means to be human Artificial intelligence is today's story the story behind all other stories It is the Second Coming and the Apocalypse at the same time Good AI versus evil AI John Brockman More than sixty years ago mathematician philosopher Norbert Wiener published a book on the

place of machines in society that ended with a warning we shall never receive the right answers to our questions unless we ask the right questions The hour is very late and the choice of good and evil knocks at our door In the wake of advances in unsupervised self improving machine learning a small but influential community of thinkers is considering Wiener s words again In Possible Minds John Brockman gathers their disparate visions of where AI might be taking us The fruit of the long history of Brockman s profound engagement with the most important scientific minds who have been thinking about AI from Alison Gopnik and David Deutsch to Frank Wilczek and Stephen Wolfram Possible Minds is an ideal introduction to the landscape of crucial issues AI presents The collision between opposing perspectives is salutary and exhilarating some of these figures such as computer scientist Stuart Russell Skype co founder Jaan Tallinn and physicist Max Tegmark are deeply concerned with the threat of AI including the existential one while others notably robotics entrepreneur Rodney Brooks philosopher Daniel Dennett and bestselling author Steven Pinker have a very different view Serious searching and authoritative Possible Minds lays out the intellectual landscape of one of the most important topics of our time

Minds and Computers Matt Carter,2007-02-14 Could a computer have a mind What kind of machine would this be Exactly what do we mean by mind anyway The notion of the intelligent machine whilst continuing to feature in numerous entertaining and frightening fictions has also been the focus of a serious and dedicated research tradition Reflecting on these fictions and on the research tradition that pursues Artificial Intelligence raises a number of vexing philosophical issues Minds and Computers introduces readers to these issues by offering an engaging coherent and highly approachable interdisciplinary introduction to the Philosophy of Artificial Intelligence Readers are presented with introductory material from each of the disciplines which constitute Cognitive Science Philosophy Neuroscience Psychology Computer Science and Linguistics Throughout readers are encouraged to consider the implications of this disparate and wide ranging material for the possibility of developing machines with minds And they can expect to de

Made-up Minds Gary L. Drescher,1991 Made Up Minds addresses fundamental questions of learning and concept invention by means of an innovative computer program that is based on the cognitive developmental theory of psychologist Jean Piaget Drescher uses Piaget s theory as a source of inspiration for the design of an artificial cognitive system called the schema mechanism and then uses the system to elaborate and test Piaget s theory The approach is original enough that readers need not have extensive knowledge of artificial intelligence and a chapter summarizing Piaget s work assists readers who lack a background in developmental psychology
