Artificial Reality II

MYRON W. KRUEGER

"Myron Krueger's *Artificial Reality II* reads like science fiction come true. And it is."

Ben Bova, science fiction writer and editor, author of *Cyberbooks*

"*Artificial Reality II* is a timely re-visit of a catalytic contribution to the emerging world of Artificial Reality/Virtual Reality. Krueger further enhances the original by placing it in the context of other work in the field."

Scott Fisher, Director, NASA Virtual Environment Laboratory, 1986-1990; Director, Telepresence Research

"Every culture has its own group of artists and engineers that can lead and shape the form of the future. Through this overview of artificial reality and his own innovative work, Myron Krueger maps out a fascinating world which may soon be an integral part of our lives."

Peter Gabriel, musician, *Real World*

"I am delighted that the book is now once again available. And in expanded form, there is a book about the future of technology that is enjoyable, enriching, and prophetic. No technological futurists, instead, a new form of art. One that requires the delighted activities of the viewer, artisans in which one is simultaneously participant and viewer, experimenter, and observer. Artistic for the gallery and the home."

Donald Norman, University of California at San Diego, author, *The Design of Everyday Things*

"Computer-implemented artificial realities allow humans to directly experience anything the mind can imagine. Myron Krueger, a pioneer in the field, provides an up-to-date look at the history, current development, and future potential of this emerging medium. Krueger's vision, eloquently communicated in this book, is an essential resource for humans and technologists seeking to apply artificial realities to arts, entertainment, education, and industry. It is an inspiration to everyone striving to use computers to enrich the human experience and an affirmation that technology can advance the state of the arts."

John Miller, *Autodesk Inc.*
