*Homeland Security Technologies for the 21st Century* Ryan K. Baggett, Chad S. Foster, Brian K. Simpkins, 2017-04-17 A comprehensive textbook that overviews common technologies utilized within the homeland security enterprise with an emphasis on contemporary homeland security mission areas and end user applications. Designed for students entering or currently working in the safety security and emergency management disciplines in the public or private sectors, this textbook presents a broad array of homeland security technology types from the viewpoint of end user applications and homeland security mission areas. The authors investigate various theories behind the use of technologies and assess the importance of technologies for achieving goals and objectives. The content includes not only technical capabilities but also a blend of sample applications of technologies using an all hazards framework and use cases at all levels of practice including both the public and private sectors. The authors provide an overview of preparedness applications, preventive and protective systems, and mitigation response and recovery technologies. Topics such as ethical and privacy concerns associated with implementing technologies and use of the Internet and social media receive special attention. In addition to readers directly involved in the security disciplines, this book will be useful for students in technical fields of study such as geographic information systems, GIS, computer science, or engineering who are seeking information on standards, theories, and foundations underlining homeland security technologies.

**Jeering Dreamers** John Anzalone, 2023-04-17 The re-emergence in recent years of Villiers de l'Isle Adam as a key figure in fin de siècle literature can be attributed in large part to the intense interest his prescient *l'Ève future* (1886) has generated among scholars. In effect, the novel confronts with breathtaking focus central taboos and ambivalences about the decadent period. It posits an inescapable mechanistic linkage between desire and technology; it suggests the constructed nature of gender; it casts woman down so as to exalt her, even as it intimates the arbitrariness and fragility of the empowerment prerogatives.

implicit in such an operation It is this mine for the study of fin de siècle mentalities that the present volume explores Begun at the 1992 NCFS colloquium at Binghamton University as a collective project of the Friends of Villiers Jeering Dreamers brings together 13 essays by Villiers scholars from both sides of the Atlantic Their work promises in the words of the eminent Villierien Alan Raitt to clairer l'Eve future d'un jour nouveau ou plus exactement de plusieurs jours nouveaux
