Seemingly marooned on the freezing cold planet of Tran-ky-ky, Ethan Frome Fortune doesn't know if he'll enjoy the warmth of his old home ever again. That is until a group of scientists at the Brass Monkey outpost detect something unusual in the atmosphere. Aboard the massive icerigger *Slanderscree* once again, Ethan and his companions are headed south to investigate a mysterious warm spot on the ice planet. However, no one is prepared for what they find: open water. And this global environmental disaster is not a natural phenomenon. Ethan helped bring civilization to the Tran, but civilization seems to be pushing back. Now he and his crew must determine the causes of this chaos before their friends are out of a planet.

The Icerigger Trilogy Alan Dean Foster,2012-09-11 Three novels from a New York Times bestselling author: an exhilarating adventure that follows a group of human castaways stranded on an icy alien planet. Icy, desolate, and sharply carved by hurricane-force winds, Tran-ky-ky is a terrible place to crash land. But a botched kidnapping aboard the interstellar transport *Antares* sends Ethan Frome Fortune and a handful of his fellow travelers tumbling toward the stormy planet. Stranded and cut off from civilization, the castaways struggle to survive. In this page-turning trilogy, Fortune confronts vicious predators, even the plants want to make a meal of him, and forges an alliance with a native Tran. As he searches for a way off Tran-ky-ky, he helps the Tran gain admission to the Humanx Commonwealth and learns about their troubled history. Just as Fortune accepts that he'll never escape the harsh planet and acclimates to its relentless winter, he learns that scientists have detected rising temperatures in the atmosphere. This sinister change leads Fortune to a thrilling and unexpected final adventure.

*Living U.S.-China Relations* David M. Lampton,2024-01-05 This book addresses head-on a core current critique of how the Sino-American relationship was managed across eight administrations. The essence of this critique is that naive U.S. elites confused their hopes for democracy and a globally responsible China with the actual prospects for those desirable ends and, in the process, unwisely traded away American interests, competitive position, and national security. In short, the U.S. bolstered

the principal strategic threat that it now faces This book is a fact based challenge to that simplistic narrative Today developments in the U S China relationship are converging in a fashion that is setting off fire alarm bells At this moment in 2023 the underbrush is plentiful the winds unfavorable and the atmosphere parched The fire hazard between America and China is increasing unlike anything we have seen in a half century This volume describes our current condition and explains the last half century that has brought us to this perilous day The defining and unique characteristic of Living U S China Relations is that it tells the story of U S China ties as the relationship between two societies not just two states and it does so through the author s lived experience over nearly sixty years

**The Driver in the Driverless Car** Vivek Wadhwa,Alex Salkever,2017-11-25 Technology is advancing faster than ever but for better or for worse On the one hand astonishing technology developments such as personalized genomics self driving cars drones and artificial intelligence could make our lives healthier safer and easier On the other hand these very same technologies could raise the specter of a frightening and alienating future eugenics a jobless economy a complete loss of privacy and an ever worsening spiral of economic inequality How can we make appropriate decisions about whether and how to adopt new technologies Vivek Wadhwa and Alex Salkever propose that we ask three questions Does the technology have the potential to benefit everyone equally What are the risks and the rewards Does the technology more strongly promote autonomy or independence They subject a host of new and potential technologies to these questions but ultimately it is up to the reader to make the final decision
