The practical properties of many materials are dominated by surface and near surface composition and structure. An understanding of how the surface region affects material properties starts with an understanding of the elemental composition of that region. Since the most common contaminants are light elements for example oxygen nitrogen carbon and hydrogen there is a clear need for an analytic probe that simultaneously and quantitatively records elemental profiles of all light elements. Energy recoil detection using high energy heavy ions is unique in its ability to provide quantitative profiles of light and medium mass elements. As such this method holds great promise for the study of a variety of problems in a wide range of fields. While energy recoil detection is one of the newest and most promising ion beam analytic techniques it is also the oldest in terms of when it was first described. Before discussing recent developments in this field perhaps it is worth reviewing the early days of this century when the first energy recoil detection experiments were reported.

Handbook of Modern Ion Beam Materials Analysis Joseph R. Tesmer, Michael Anthony Nastasi, 1995 The Handbook of Modern Ion Beam Materials Analysis is a compilation of updated techniques and data for use in the ion beam analysis of materials. The information presented is unavailable collectively from any other source and places a strong emphasis on practical examples of the analysis techniques as they are applied to common problems. The book's 13 chapters cover discussions and examples while 18 appendices provide extensive compilations of relevant data. Numerous techniques are discussed including elastic recoil detection and activation analysis. Material in the book pushes the boundaries of ion beam analysis to higher energies. The detection of light elements is emphasized and background materials in the areas of energy loss nuclear theory instrumentation analysis pitfalls and radiation safety are also provided for a better understanding of the principles basic to the techniques.
