British Export Performance S. J. Wells, Sidney J. Wells, Wells, 2011-03-03 A 1964 analysis of the decline in Britain's share of world trade considering the impact of the stop go economic policies of the 1950s

British Business in the Formative Years of European Integration, 1945-1973 Neil Rollings, 2007-12-10 This book questions conventional accounts of the history of European integration and British business Integration accounts normally focus on the nation state while Neil Rollings focuses on business and its role in the development of European integration which business historians have previously overlooked Business provided a key link between economic integration political integration and the process of Europeanization British businessmen perceived early on that European integration meant much more than the removal of tariffs and access to new markets Indeed British entry into the European community would alter the whole landscape of the European working environment Consideration of European integration is revealed as a complex relative and dynamic issue covering many issues such as competition policy taxation and company law Based on extensive archival research this book uses the case of business to emphasize the need to blend national histories with the history of European integration

Strategies for International Industrial Marketing (RLE International Business) Peter W Turnbull, Jean-Paul Valla, 2013-05-07 This study considers the key strategic issues of the management of customer relationships in international industrial marketing It is based on extensive original research by the International Marketing and Purchase Group The book reports on that research in particular pointing out the differences in approach by different national groups in Europe

Economic Growth in Twentieth Century Britain Derek H. Aldcroft, Peter Fearon, 1969-11-01

Britain's Economic Growth 1920-1966 A.J. Youngson, 2013-11-05 Professor Youngson's book is an unbiased review of Britain's past experience and present difficulties Few sacred cows are spared There is no pretence that fundamental problems were resolved at the time of its first publication in 1967 Many economic historians fail in their assessment of Britain's economic prospects as there is a tendency to look only at recent events to explain current problems Youngson saw that this was short sighted An economy like an airliner cannot suddenly change its course it is subject to persistent forces and tendencies it is powerfully affected by what has happened in the recent and sometimes in the not so recent past Therefore to understand the problems of today we must know something of how persistent they are and about what solutions have already been tried This book provides a thorough examination of Britain's economic growth from 1920 1966 and contextualises Britain's situation within its true historical perspective This book was first published in 1967

UK Export Performance by Industry Maria Barriol, 2006 The United Kingdom's export market share has declined steadily for a number of years both in aggregate and in many industries within the manufacturing sector A major determinant of demand for an industry's exports is the price of those exports relative to the prices of international competitors This article shows that UK export prices tend to follow the prices set by foreign competitors quite closely when expressed in a common currency So for many exporters a dominant depressing

influence on market share over the past decade was the significant appreciation of the sterling exchange rate in the late 1990s. But other factors also played a role. In particular, a number of high tech UK industries have been able to increase their market shares, perhaps reflecting a greater ability to differentiate their products from those of their competitors.
