Destination Image - Do Berlin's tourist authorities have to consider cultural segmentation when developing marketing strategies relating to the place's image in an era that refers to the global tourist? Wassim El Kadhi, 2008-10-13 Inhaltsangabe Abstract Destination image is considered as the key in attracting tourists This thesis purported to scrutinise whether Berlin s tourist authorities have to consider cultural segmentation when developing marketing strategies relating to the place s image As an exploratory study it examined Berlin s image among youths from Arab Islamic and Protestant European countries and confronted them In an era that is subjected to globalisation and refers to the global tourist it is vindicated to pose this question Various scholars are convinced that the world tourism market may be treated as a homogenous one due to globalisation However the literature also provides some opposing bearings and discusses them It further gives some background information on Berlin as a tourist destination addresses destination image concerning influential cultural factors and the implications of globalisation on consumer behaviour Finally it studies the Arab Islamic and Protestant European youth cultures in the light of globalisation and possible modifying effects In response to the objectives of this study primary research was conducted It involved both quantitative and qualitative data collection methods Field and online surveys enabled the researcher to collect 239 completed questionnaires 103 Arab Islamic and 136 Protestant European youths Besides semi structured interviews and focus group discussions were carried out at EF Language School Bournemouth Following the completion of the survey obtained data was entered into SPSS Frequencies and means were calculated for each variable and several ANOVA tests and cross tabulations conducted in order to stress destination image s specificity in terms of cultural background Research findings revealed significant differences between the groups regarding their perception of Berlin Arab Islamic youths had a more negative stance towards Berlin than their counterparts Not only did divergences occur between the groups but also within the groups Thus destination image is culture specific and may also vary across countries sharing similar cultural backgrounds Overall despite the effects of globalisation cultural market segmentation still remains a vital element for a tourist place such as Berlin where the image management is concerned The thesis provides recommendations for Berlin congruent with the outcomes and concludes with the provision of
