

# WHAT IS HUMANISM?

**Humanism** is a Renaissance cultural movement which turned away from medieval scholasticism and revived interest in ancient Greek and Roman thought.

**Humanism** is an approach to life based on reason and our common humanity, recognizing that moral values are properly founded on human nature and experience alone.

**Humanists** reject the idea or belief in a supernatural being such as God. This means that humanists class themselves as agnostic or atheist.

Humanism and History Joseph M. Levine, 2019-05-15 In this thoughtful and engaging book Joseph M Levine reveals how Renaissance humanists and their neoclassical progeny transformed the ways that the English practiced history and viewed the past Between 1500 and 1800 many of the methods of modern historiography were first introduced into England where they developed under the influence of classical philology and the study of antiquities English scholars gradually differentiated past from present and successfully detected and recovered the ancient Roman Saxon Celtic and Norman cultures A first attempt was also made to distinguish historical fact from fiction and such legends as the Trojan origins of Britain and the Donation of Constantine were rejected Levine sets the scene for these developments with an examination of the historical outlook of William Caxton at the end of the Middle Ages he concludes with an essay on Edward

Gibbon whose work three centuries later he argues summarizes the whole achievement of early modern historiography Along the way Levine investigates such topics as the transformation the antiquarian enterprise into modern archaeology the quarrel between the ancients and the moderns the Gothic revival and the influence of humanism on Francis Bacon and the new philosophy *The Humanist World of Renaissance Florence* Brian Maxson,2014 The Humanist World of Renaissance Florence offers the first synthetic interpretation of the humanist movement in Renaissance Florence in more than fifty years

**The Black Humanist Tradition in Anti-Racist Literature** Alexandra Hartmann,2023-05-13 This book presents an intellectual history and theoretical exploration of black humanism since the civil rights era Humanism is a human centered approach to life that considers human beings to be responsible for the world and its course of history Both the heavily theistic climate in the United States as well as the dominance of the Black Church are responsible for black humanism s existence in virtual oblivion For those who believe the world to be one without supernatural interventions human action matters greatly and is the only possible mode for change Humanists are thus committed to promoting the public good through human effort rather than through faith Black humanism originates from the lived experiences of African Americans in a white hegemonic society Viewed from this perspective black humanist cultural expressions are a continuous push to imagine and make room for alternative life options in a racist society Alexandra Hartmann counters religion s hegemonic grasp and uncovers black humanism as a small yet significant tradition in recent African American culture and cultural politics by studying its impact on African American literature and the ensuing anti racist potentials The book demonstrates that black humanism regards subjectivity as embodied and is thus a worldview that is characterized by a fragile hope regarding the possibility of progress racial and otherwise in the country *Michigan Christian Advocate* ,1925
