A History of Psychology Thomas Hardy Leahey,2017-10-02 A History of Psychology places social, economic, and political forces of change alongside psychology's internal theoretical and empirical arguments, illuminating how the external world has shaped psychology's development and in turn how the late twentieth century's psychology has shaped society. Featuring extended treatment of important movements such as the Enlightenment and the Scientific Revolution, the textbook approaches the material from an integrative rather than wholly linear perspective. The text carefully examines how issues in psychology reflect and affect concepts that lie outside the field of psychology's technical concerns as a science and profession. This new edition features expanded attention on psychoanalysis after its founding, as well as new developments in cognitive science, artificial intelligence, and behavioral economics. Throughout the book, it strengthens its exploration of psychological ideas and the cultures in which they developed and reinforces the connections between psychology, modernism, and postmodernism. The textbook covers scientific, applied, and professional psychology and is appropriate for higher-level undergraduate and graduate students.

[Lost Calendars](#) Kaia Stonebrook,AI,2025-03-04 Lost Calendars explores the fascinating history of timekeeping by delving into ancient and often forgotten calendrical systems. It reveals how civilizations tracked time, embedding sophisticated science and deep cultural significance into their methods. These lost calendars offer insights into the worldviews of past societies and challenge our assumptions about the universality of time. For example, the intricate Mayan calendar system showcased remarkable mathematical precision linked to complex cosmological beliefs. Similarly, Mesopotamian calendars were closely tied to agriculture and early record-keeping practices, demonstrating the vital role of timekeeping in daily life. The book examines the technological and astronomical expertise needed to construct these calendars and their connection to social, religious, and agricultural practices. It progresses from introducing fundamental concepts like solar and lunar calendars to specific case studies, ultimately discussing why these systems were abandoned due to factors like conquest or the adoption of standardized timekeeping. By treating calendars as cultural artifacts, Lost Calendars provides invaluable insights into the intellectual and spiritual lives of past civilizations, offering alternative ways of understanding our place in the cosmos.

Reality, Magic, and Other Lies Pauline Greenhill,2020-10-13 Exploration of fairy tale movies that blur the line between reality and magic. Reality, Magic, and Other Lies: Fairy Tale Film Truths explores connections and discontinuities between lies and truths in fairy tale films to directly address the current politics of fairy tale

and reality Since the Enlightenment notions of magic and wonder have been relegated to the realm of the fanciful with science and reality understood as objective and true But the skepticism associated with postmodern thought and critiques from diverse perspectives including but not limited to anti racist decolonial disability and feminist theorizing renders this binary distinction questionable Further the precise content of magic and science has shifted through history and across location Pauline Greenhill offers the idea that fairy tales particularly through the medium of film often address those distinctions by making magic real and reality magical Reality Magic and Other Lies consists of an introduction two sections and a conclusion with the first section Studio Director and Writer Oeuvres addressing how fairy tale films engage with and challenge scientific or factual approaches to truth and reality drawing on films from the stop motion animation company LAIKA the independent filmmaker Tarsem and the storyteller and writer Fred Pellerin The second section Themes and Issues from Three Fairy Tales shows fairy tale film magic exploring real life issues and experiences using the stories of Hansel and Gretel The Juniper Tree and Cinderella The concluding section Moving Forward suggests that the key to facing the reality of contemporary issues is to invest in fairy tales as a guide rather than a means of escape by gathering your community and never forgetting to believe Reality Magic and Other Lies which will be of interest to film and fairy tale scholars and students considers the ways in which fairy tales in their mediated forms deconstruct the world and offer alternative views for peaceful appropriate just and intersectionally multifaceted encounters with humans non human animals and the rest of the environment
