

The background of the cover is a light blue wall with a textured surface. In the upper left and middle sections, there are bougainvillea plants with green leaves and bright pink flowers. The flowers are in various stages of bloom, some fully open and some as buds. The lighting is bright, casting soft shadows of the leaves and flowers onto the wall.

Pereira,Carlo Manzo,2026-01-06 Build AI Models from Scratch No PhD Required Deep Learning Crash Course is a fast paced thorough introduction that will have you building today's most powerful AI models from scratch No experience with deep learning required Designed for programmers who may be new to deep learning this book offers practical hands on experience not just an abstract understanding of theory You'll start from the basics and using PyTorch with real datasets you'll quickly progress from your first neural network to advanced architectures like convolutional neural networks CNNs transformers diffusion models and graph neural networks GNNs Each project can be run on your own hardware or in the cloud with annotated code available on GitHub You'll build and train models to Classify and analyze images sequences and time series Generate and transform data with autoencoders GANs generative adversarial networks and diffusion models Process natural language with recurrent neural networks and transformers Model molecules and physical systems with graph neural networks Improve continuously through reinforcement and active learning Predict chaotic systems with reservoir computing Whether you're an engineer scientist or professional developer you'll gain fluency in deep learning and the confidence to apply it to ambitious real world problems With Deep Learning Crash Course you'll move from using AI tools to creating them

*Positive Operator Semigroups* András Bátkai,Marjeta Kramar Fijavž,Abdelaziz Rhandi,2017-02-13 This book gives a gentle but up to date introduction into the theory of operator semigroups or linear dynamical systems which can be used with great success to describe the dynamics of complicated phenomena arising in many applications Positivity is a property which naturally appears in physical chemical biological or economic processes It adds a beautiful and far reaching mathematical structure to the dynamical systems and operators describing these processes In the first part the finite dimensional theory in a coordinate free way is developed which is difficult to find in literature This is a good opportunity to present the main ideas of the Perron Frobenius theory in a way which can be used in the infinite dimensional situation Applications to graph matrices age

structured population models and economic models are discussed The infinite dimensional theory of positive operator semigroups with their spectral and asymptotic theory is developed in the second part Recent applications illustrate the theory like population equations neutron transport theory delay equations or flows in networks Each chapter is accompanied by a large set of exercises An up to date bibliography and a detailed subject index help the interested reader The book is intended primarily for graduate and master students The finite dimensional part however can be followed by an advanced bachelor with a solid knowledge of linear algebra and calculus

*Group Representation Theory* Meinolf Geck, 2007-05-07

After the pioneering work of Brauer in the middle of the 20th century in the area of the representation theory of groups many entirely new developments have taken place and the field has grown into a very large field of study This progress and the remaining open problems e g the conjectures of Alterin Dade Brou James etc have ensured that group representation theory remains a lively area of research In this book the leading researchers in the field contribute a chapter in their field of specialty namely Brou Finite reductive groups and spetses Carlson Cohomology and representations of finite groups Geck Representations of Hecke algebras Seitz Topics in algebraic groups Kessar and Linckelmann Fusion systems and blocks Serre On finite subgroups of Lie groups Th venaz The classification of endo permutaion modules and Webb Representations and cohomology of categories
