Autonomous Development:

Autonomous Development Raff Carmen,1996 Raff Carmen is one of the very few challenging and ground breaking thinkers who can change the way in which we perceive and practise development In this comprehensive book he succeeds in interweaving a vast panorama of theories and methodologies with practical case studies to bring complex issues dramatically to life His unerring commitment to bottom up development rooted in people s organizations and the power of culture is refreshing at a time of widespread disillusion Most importantly he convinces us that alternative approaches have worked and can work in the future Highly recommended for anyone who wants to challenge assumptions and broaden the horizon of development debate and practice *Autonomous Development* Raff Carmen,1996

The Routledge Handbook of Postcolonial Social Work Tanja Kleibl, Ronald Lutz, Ndangwa Noyoo, Benjamin Bunk, Annika Dittmann, Boitumelo Seepamore, 2019-07-30 The Routledge Handbook of Postcolonial Social Work reflects on and dissects the challenging issues confronting social work practice and education globally in the post colonial era By analysing how countries in the so called developing and developed world have navigated some of the inherited systems from the colonial era it shows how they have used them to provide relevant social

work methods which are also responsive to the needs of a postcolonial setting This is an analytical and reflexive handbook that brings together different scholars from various parts of the world both North and South so as to distill ideas from scholars relating to ways that can advance social work of the South and critique social work of the North in so far as it is used as a template for social work approaches in postcolonial settings It determines whether and how approaches knowledge bases and methods of social work have been indigenised and localised in the Global South in the postcolonial era This handbook provides the reader with multiple new theoretical approaches and empirical experiences and creates a space of action for the most marginalised communities worldwide It will be of interest to researchers and practitioners as well as those in social work education

The Family and Social Change in Chinese Societies Dudley L. Poston, Jr., Wen Shan Yang, Demetrea Nicole Farris, 2013-11-26 This book focuses on families and their changes in Taiwan and China Traditional notions of what constitutes a family have been changing in China Taiwan and other Asian countries The chapters in this book provide interesting methodological and substantive contributions to the discourse on family and social change in Chinese societies They also underscore the implications of the various social changes in Chinese families Written by Chinese and Western scholars they provide an unprecedented overview of what is known about the effects of social change on Chinese families One might think that defining a family is an easy task because the family is so significant to society and is universal The family is the first place we learn culture norms values and gender roles Families exist in all societies throughout the world but their constitution differs In the past several decades there have been many changes in the family in Taiwan and China For instance whereas in the West we use a bilineal system of descent in which descent is traced through both the mother's side and the father's side of the family in many parts of China descent is patrilineal although this is changing and China and Taiwan are starting to assume a family constitution similar to that in the West This and other issues are discussed in great detail in this book Indeed it is the very nature of the differences that motivated the writing of this book on changing families in Taiwan and China The chapters in Part I The Family in Taiwan and China focus on the basic family issues in Taiwan and China that provide the groundwork for many of the chapters that follow Chapter 1 is about the distribution of resources in the family in Taiwan Chapter 2 focuses on filial piety and the autonomous development of adolescents in the Taiwanese family and Chapter 3 explores the important issue of family poverty in Taiwan Chapter 4 moves away from Taiwan and looks at several issues of family growth and change in Hong Kong noting the interesting similarities and differences between Hong Kong and China Part II Issues of Marriage the Family and Fertility in Taiwan and China focuses specifically on marriage family and fertility In Chapter 5 the authors discuss the relationships between marital status socioeconomic status and the subjective well being among women in Hong Kong and Taiwan Chapter 6 describes patterns of sexual activity in China and the United States Chapter 7 considers gender imbalances in Taiwan and their impact on the marriage market Chapter 8 also focuses on Taiwan and examines the effects of mothers attitudes on daughters interaction with their mothers

in law Chapter 9 compares female and male fertility trends and changes in Taiwan Part III Children and the Family in East Asia and in Western Countries consists of comparative studies of the family and children Chapter 10 examines the dynamics of grandparents caring for children in China Chapter 11 explores family values and parent child interaction in Taiwan Chapter 12 examines the significant amount of diversity among families in contemporary Taiwan Chapter 13 describes adolescent development in Taiwan Chapter 14 examines the impact of son preference on fertility in China South Korea and the United States And Chapter 15 explores the determinants of intergenerational support in Taiwan The final chapter in our book the only chapter in Part IV The Family and the Future in Taiwan examines the future of the family in Taiwan with respect especially to the marriage market and aged dependency

The Politics of Urban Development Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference
