**Spink & Son**

## Double Headed Coin:

**The Double-headed Coin** Margaret Sonnenberg,1987-01-01      **The Double-headed Coin** Morris H. Siegel,1937

*Statistics and the Evaluation of Evidence for Forensic Scientists* Colin Aitken,Franco Taroni,2004-08-13 The first edition of *Statistics and the Evaluation of Evidence for Forensic Scientists* established itself as a highly regarded authority on this area Fully revised and updated the second edition provides significant new material on areas of current interest including Glass Interpretation Fibres Interpretation Bayes Nets The title presents comprehensive coverage of the statistical evaluation of forensic evidence It is written with the assumption of a modest mathematical background and is illustrated throughout with up to date examples from a forensic science background The clarity of exposition makes this book ideal for all forensic scientists lawyers and other professionals in related fields interested in the quantitative assessment and evaluation of evidence There can be no doubt that the appreciation of some evidence in a court of law has been greatly enhanced by the sound use of statistical ideas and one can be confident that the next decade will see further developments during which time this book will admirably serve those who have cause to use statistics in forensic science D V Lindley      **Reasoning about Uncertainty, second edition** Joseph Y. Halpern,2017-03-31 Formal ways of representing uncertainty and various logics for reasoning about it updated with new material on weighted probability measures complexity theoretic considerations and other topics In order to deal with uncertainty intelligently we need to be able to represent it and reason about it In this book Joseph Halpern examines formal ways of representing uncertainty and considers various logics for reasoning about it While the ideas presented are formalized in terms of definitions and theorems the emphasis is on the philosophy of representing and reasoning about uncertainty Halpern surveys possible formal systems for representing uncertainty including probability measures possibility measures and plausibility measures considers the updating of beliefs based on changing information and the relation to Bayes theorem and discusses qualitative quantitative and plausibilistic Bayesian networks This second edition has been updated to reflect Halpern s recent research New material includes a consideration of weighted probability measures and how they can be used in decision making analyses of the Doomsday argument and the Sleeping Beauty problem modeling games with imperfect recall using the runs and systems approach a discussion of complexity theoretic considerations the application of first order conditional logic to security Reasoning about Uncertainty is accessible and relevant to researchers and students in many fields including computer science artificial intelligence economics particularly game theory mathematics philosophy and statistics      **Introducing Statistics** Graham Upton,Ian Cook,2001-01-18 *Introducing Statistics* has been revised to meet the requirements of all the new A Level specifications It covers in one volume all the statistics required by students taking single subject Advanced Level Mathematics and also provides the basis for a first course in statistics in higher education This is a highly accessible resource supported by clear illustrations nearly 200 worked examples and packed with examination style questions Suggestions for practical work and for calculator and

computer exercises are included *The Numismatic Circular and Catalogue of Coins, Tokens, Commemorative & War Medals, Books & Cabinets* Spink & Son,1908 **The Meaning of If** Justin Khoo,2022 Despite its small stature it occupies a central place both in everyday language and the philosophical lexicon In allowing us to talk about hypothetical situations it raises a host of thorny philosophical puzzles about language and logic Addressing them requires tools from linguistics logic probability theory and metaphysics Justin Khoo uses these tools to navigate a maze of interconnected issues about conditionals some of which include the nature of linguistic communication the relationship between logical and natural languages and the relationship between different kinds of modality According to Khoo's theory conditionals form a unified class of expressions which share a common semantic core that encodes inferential dispositions Thus rather than represent the world conditionals are devices used to communicate how we are disposed to infer Khoo shows that this theory can be extended to predict the probabilities of conditionals as well as how different kinds of conditionals differ both semantically and pragmatically Khoo's book will make for a significant contribution to the literature on conditionals and should be of interest to philosophers linguists and computer scientists **The Coin Collector's Manual** Henry Noel Humphreys,1897 *Business, the Magazine for Office, Store and Factory* ,1913 **Numismatic Circular List of Coins, Medals, War Medals, Books, Etc. Offered for Sale** Spink & Son,1909 Troja. Results of the latest researches and discoveries on the site of Homer's Troy and in the heroic tumulil and other sites, made in the year 1882. And a narrative of a journey in the Troad in 1881 Heinrich Schliemann,1884 *Troja* Heinrich Schliemann,1884 **Dictionnaire général français-anglais, nouvellement rédigé d'après les dictionnaires français de l'Académie, de Laveaux, de Boiste, de Bescherelle, etc., les dictionnaires anglais de Johnson, Webster, Richardson, etc. ...** Alexander Spiers,1876 **Scientific Method** Barry Gower,2012-10-12 The central theme running throughout this outstanding new survey is the nature of the philosophical debate created by modern science's foundation in experimental and mathematical method More recently recognition that reasoning in science is probabilistic generated intense debate about whether and how it should be constrained so as to ensure the practical certainty of the conclusions drawn These debates brought to light issues of a philosophical nature which form the core of many scientific controversies today **Scientific Method A Historical and Philosophical Introduction** presents these debates through clear and comparative discussion of key figures in the history of science Key chapters critically discuss Galileo's demonstrative method Bacon's inductive method and Newton's rules of reasoning the rise of probabilistic Bayesian methods in the eighteenth century the method of hypotheses through the work of Herschel Mill and Whewell the conventionalist views of Poincaré and Duhem the inductivism of Peirce Russell and Keynes Popper's falsification compared with Reichenbach's enumerative induction Carnap's scientific method as Bayesian reasoning The debates are brought up to date in the final chapters by considering the ways in which ideas about method in the physical and biological sciences have affected thinking about method in the social sciences This debate is analyzed through the ideas

of key theorists such as Kuhn Lakatos and Feyerabend     Dye's Coin Encyclopædia John S. Dye,1883     **Catalogue of the Coins Collected by Chas. J. Rodgers, and Purchased by the Gouvernement of the Panjâb** Rodgers,1894     **A Popular Handbook to the Greek and Roman Antiquities in the British Museum** British Museum. Department of Greek and Roman Antiquities,1903     **Catalogue of the Greek Coins of Lycia, Pamphylia, and Pisidia** Sir George Francis Hill,British Museum. Department of Coins and Medals,1897     *A Catalogue of the Greek Coins in the British Museum: Lycia, Pamphylia, and Pisidia* British Museum. Department of Coins and Medals,1897     *Catalogue of the Coins of the Vandals, Ostrogoths and Lombards* British Museum. Department of Coins and Medals,Warwick William Wroth,1911
