Coping With Terror An Israeli Perspective:

Coping with Terror Ira Sharkansky,2003-01-01 A resurgence of worldwide terrorism threats has become a major problem for Israel the United States and numerous other countries While citizens politicians and commentators demand a solution the Israeli experience suggests that there are limits to the effectiveness of heroic action in solving this problem A level headed examination of a deeply unsettling topic Coping With Terror argues that strategic responses to terrorism must focus on managing terrorism and its effects on the population rather than on solving it outright It describes personal and collective stresses associated with terror and examines the idea of coping as the key to understand how policymakers military personnel and ordinary citizens deal with these stresses A non polemical approach to a sensitive and serious topic Coping With Terror provides new perspectives on this global problem

Terror Leonard A. Cole,2007-05-23 No country has experienced more acts of terrorism over a prolonged period than Israel The frequency of attacks has propelled Israel toward innovative methods to address the threat Indeed treating so many victims of physical and psychological trauma has given rise to the new field of terror medicine In a gripping narrative terrorist expert Leonard A Cole describes how different segments of Israeli society have coped with terrorism survivors of attacks families of victims emergency responders doctors and nurses and in the end the general population He also interviews Palestinians including imprisoned handlers of suicide bombers who endorse or deplore suicide bombings He concludes that the Israeli experience with preparedness and coping offers valuable lessons for the United States

Perspectives on Immigration and Terrorism Giovanni Maria Ruggiero,2011 Globalization accompanied by more options for communication has led to sweeping changes which mean that the economic political and cultural realities of one country may influence those of other countries despite them being geographically far apart Increased migration both within and across national borders serves only to amplify the potential problems that this can cause Trauma and violence are often associated with the migration process and even where they are not migration and immigration represent a massive challenge to individuals which frequently involves loss of identity alienation and discrimination This book is a collection of 16 papers from the NATO sponsored meeting entitled Perspectives on Immigration and Terrorism which took place in Milan Italy in March 2010 and which focused on the psychological and socio cultural precursors to the radicalization of immigrant youth in Europe Some of the topics explored include factors of cultural and ideological opposition to western societies the growing pressure of the process of secularization illegal aspects of terrorism immigration as a possible trajectory for political radicalism the interaction between traumatic experience and immigration acculturation and adjustment to a new culture potential predictors of terrorist behavior and the role of a sense of national belonging The book provides many perspectives on the way in which vulnerability to radical ideology may develop among individuals whose lack of personal and social resources may result in alienation frustration and desperation It also offers solutions which might be implemented to mitigate or prevent this problem
