Diachrony of differential argument marking Ilja A. Seržant, Alena Witzlack-Makarevich, 2018 While there are languages that code a particular grammatical role e

g subject or direct object in one and the same way across the board many more languages code the same grammatical roles differentially The variables which condition the differential argument marking or DAM pertain to various properties of the NP such as animacy or definiteness or to event semantics or various properties of the clause While the main line of current research on DAM is mainly synchronic the volume tackles the diachronic perspective The tenet is that the emergence and the development of differential marking systems provide a different kind of evidence for the understanding of the phenomenon The present volume consists of 18 chapters and primarily brings together diachronic case studies on particular languages or language groups including e g Finno Ugric Sino Tibetan and Japonic languages The volume also includes a position paper which provides an overview of the typology of different subtypes of DAM systems a chapter on computer simulation of the emergence of DAM and a chapter devoted to the cross linguistic effects of referential hierarchies on DAM

EGYPTIANISMS IN THE BOOK OF MORMON AND OTHER STUDIES Robert F. Smith, 2020-12-31 Three studies of the Book of Mormon 1 Detailed analysis of the Egyptian characteristics of the Book of Mormon 2 editorial markers in the Book of Mormon and 3 a broad look at the realia of the Book of Mormon as evidences of historical authenticity **Syntactic and Lexico-semantic Aspects of the Legal Register in Ramesside Royal Decrees** Arlette David, 2006 Analysis of the legal register of a corpus of some fifty Ramesside royal decrees dating from 1300 to 1100 B C in the wider context of forensic discourse analysis of the legislative genre in an attempt to establish constants in forensic linguistics that span time and space The general character and formulation of these normative documents reveal a remarkable homogeneity and represent a specific linguistic register that has a common textemic pragmatic and narratologic structure as well as a coherent syntactic and lexico semantic usage as modern legal dialects do today Furthermore the research tries to enrich the understanding of Egyptian legal terminology and legal categories by a systematic semantic analysis of the classifiers used in the legal lexicon classifiers in the hieroglyphic system represent iconic elements that have no phonetic value but assign words to semantic classes The extremely interesting Egyptian graphic categorization set of classifiers present in these texts offers some invaluable insights into the Egyptian conceptual organization system **So, You Want to Learn Coptic?** Sameh Younan, 2005 Coptic was the last phase in the development of Hieroglyphics and the language of the first Christians of Egypt Most scholarly attention has been directed towards the Sahidic dialect leaving Bohairic as a much maligned second cousin in spite of it remaining the liturgical language of the Coptic Orthodox Church While there are many excellent grammar books catering for Sahidic lovers there are many less options available for those interested in learning Bohairic This book aims to cater for those people especially for those without a formal introduction to linguistics With a fresh and lively approach it will be of great value to those with an interest in this area *Semitic Languages* Edward Lipiński, 2001 The first comparative grammar of the Semitic languages by H Zimmern was published a hundred years ago and the last original work of this kind was issued in Russian in 1972 by B M Grande The present grammar designed to come out in the centenary of the completion

of Zimmern's work fills thus a gap. Besides it is based on both classical and modern Semitic languages it takes new material of these last decades into account and situates the Semitic languages in the wider context of Afro Asiatic. The introduction briefly presents the languages in question. The main parts of the work are devoted to phonology, morphology and syntax with elaborate charts and diagrams. Then follows a discussion of fundamental questions related to lexicographical analysis. The study is supplemented by a glossary of linguistic terms used in Semitics, by a selective bibliography, by a general index and by an index of words and forms. The book is the result of twenty five years of research and teaching in comparative Semitic grammar.

A Grammar of Biblical Aramaic Franz Rosenthal, 2006. This grammar of Biblical Aramaic is intended in the first place for the student who wishes to acquire a thorough knowledge of the language of the Aramaic portions of the Bible. But it also hopes to stimulate interest in the Aramaic dialects in general and to create a sound basis for further Aramaic studies. It contains a brief but quite full description of the phonetic and grammatical features of Biblical Aramaic as well as tables of paradigms for the different classes of verbs. Special attention has been paid to the syntax and the important syntactic data of the language have been treated in special chapters which however are kept together with the morphological presentation. A complete glossary of Biblical Aramaic concludes the book. The 7th edition was augmented with an index of biblical citations that was compiled by Daniel M. Gurtner.

The Paraphrase of Shem (NH VII,1) Michel Roberge, 2010-06-14. This book presents the first comprehensive interpretation of the Paraphrase of Shem Codex VII 1 in the Coptic Nag Hammadi Library. The lengthy introduction discusses the literary genre of the treatise, its plan and system, its situation among the Gnostic systems, its provenance and date. The translation sets out the text in paragraphs with headings and subheadings. A short commentary follows the translation. The analysis of the system

shows that the author is working from a model of the universe whose principles have been drawn from Stoicism and Middle Platonism While dipping into the springs of the major Sethian and Valentinian systems the author follows his own way and offers an original system anticipating in many respects Manichaeism **Biblia** Charles Henry Stanley Davis,1904
