## **Corpus Concordance Collocation:**

*Corpus, Concordance, Collocation* John Sinclair, 1991 John Sinclair charts the emergence of a new view of language and the computer technology associated with it Developments in computational linguistics over the past ten years are outlined There is discussion of corpus creation and exemplification of corpus use The book goes on to spell out the implications of these developments for an understanding of collocation

**Corpus Concordance Collocation**, 1991 **Words, Grammar, Text** Rosamund Moon, 2009 John Sinclair's work is widely known and has had a far reaching influence particularly in the areas of corpus linguistics lexis phraseology lexicography grammar and discourse analysis This collection of papers written by former colleagues at Birmingham University looks at some key writings by John Sinclair with the intention of showing why his ideas are of lasting significance Contributions deal with the Cobuild Project directed by Sinclair and its innovative first dictionary collocation and the Open Choice and Idiom Principles the interactions between and interdependence of phraseology and grammar semantic prosody and the construction of meaning in text This volume was originally published as a Special Issue of *International Journal of Corpus Linguistics* 12 2 2007 [The Body in Flannery O'Connor's Fiction](#) Donald E. Hardy, 2007 This is a reading of physical obsession in O'Connor through linguistic and literary techniques This work extends the innovative thesis that it is possible to grasp the central struggle between spirit and matter in O'Connor through a close quantitative examination of the interactions of grammatical voice and physical bodies in her texts Bridging literary theory and linguistics Hardy demonstrates that the many constructions in which the body parts of O'Connor's characters are foregrounded either as subjects or objects are grammatical manipulations of semantic variations on what linguists deem the middle voice roughly indicating that the subject is acting upon himself or herself Hardy combines computational and linguistic methodology to provide a productive approach to understanding O'Connor's use of the body and its parts in her explorations of the sacramental and the grotesque Linguistic analysis of grammatical middle voice is coupled with quantitative analysis of body part words and the collocations in which they appear to present a new point of entrance to understanding O'Connor's stylistic manipulations of the body as central to the rift between spirit and matter Through this method of reading O'Connor Hardy makes a valuable contribution to the growing body of work that is introducing linguistic terminology and concepts into literary studies

**Digital Humanities in Biblical, Early Jewish and Early Christian Studies** Claire Clivaz, Andrew Gregory, David Hamidović, 2013-11-28 Ancient texts once written by hand on parchment and papyrus are now increasingly discoverable online in newly digitized editions and their readers now work online as well as in traditional libraries So what does this mean for how scholars may now engage with these texts and for how the disciplines of biblical Jewish and Christian studies might develop These are the questions that contributors to this volume address Subjects discussed include textual criticism palaeography philology the nature of ancient monotheism and how new tools and resources such as blogs wikis databases and digital publications may transform the ways in which contemporary scholars

engage with historical sources Contributors attest to the emergence of a conscious recognition of something new in the way that we may now study ancient writings and the possibilities that this new awareness raises Collocation, Selection Restriction and the Teaching of the English Verb Grammar Yvonne Müller, 2008 Seminar paper from the year 2006 in the subject English Grammar Style Working Technique grade 2 3 University of Paderborn 7 entries in the bibliography language English abstract The following paper deals with collocation selection restriction and the teaching of the English verb grammar The two main parts of the paper will be collocation which describes the syntactic relation of words and selection restriction which describes the relationship between verbs and animated or non animated subjects The place they occupy in school will be analysed So they should be investigated with a didactic view but also linguistic aspects should not be completely disregarded because it is very important especially for teachers to know which word goes together with which term and how to explain these relationships to their pupils Both the collocational and the selection restriction aspect will have their meaning explained Then a description of how to use them and at least a few suggestions are given on how to teach collocation and selection restriction in school and how to impart their rules Therefore some different suggestions for teaching are given to make allowances for the student s age and advancement To amplify what has been explained an exception will be given poetry as an intentional violation of these rules The paper ends with a short summary and a final reflection Creation Language in Romans 8 Gregory P. Fewster, 2013-04-04 Modern scholarship tends to understand Paul s use of creation language in Rom 8 18 23 as part of a commentary on the state of sub human creation This misguided position warrants an inquiry into the state of lexical study in New Testament scholarship As a result Fewster articulates a theory of lexical monosemy cast in the framework of Systemic Functional Linguistics The model is applied to Paul s use of through a robust corpus analysis and investigation into the word s role within the paragraph contributes to the cohesive structure of Rom 8 18 23 and contra the majority of interpreters functions as a metaphor for the human body **Key Thinkers in Linguistics and the Philosophy of Language** Siobhan Chapman, Christopher Routledge, 2005 A reference guide to the work of figures who have played an important role in the development of ideas about language It includes 80 entries on individual thinkers in the Western tradition ranging from antiquity to the present day chosen because of their impact on the description or theory of language Collocations and Idioms 1 Marja Nenonen, Sinikka Niemi, 2007 Applied Linguistics, 2004 **Z.
