The VAR Implementation Handbook Greg N. Gregoriou, 2009-03-15 flap For investors risk is about the odds of losing money and Value at Risk VaR is grounded in that common sense fact VAR modeling answers What is my worst case scenario and How much could I lose in a really bad month However there has not been an effective guidebook available to help investors and financial managers make their own VaR calculations until now The VaR Implementation Handbook is a hands

on road map for professionals who have a solid background in VaR but need the critical strategies models and insights to apply their knowledge in the real world Heralded as the new science of risk management VaR has emerged as the dominant methodology used by financial institutions and corporate treasuries worldwide for estimating precisely how much money is at risk each day in the financial markets The VaR Implementation Handbook picks up where other books on the subject leave off and demonstrates how with proper implementation VaR can be a valuable tool for assessing risk in a variety of areas from equity to structured and operational products This complete guide thoroughly covers the three major areas of VaR implementation measuring modeling risk and managing in three convenient sections Savvy professionals will keep this handbook at their fingertips for its Reliable advice from 40 recognized experts working in universities and financial institutions around the world Effective methods and measures to ensure that implemented VaR models maintain optimal performance Up to date coverage on newly exposed areas of volatility including derivatives Real world prosperity requires making informed financial decisions The VaR Implementation Handbook is a step by step playbook to getting the most out of VaR modeling so you can successfully manage financial risk *International Banking and Financial Market Developments*,2005 **Advances in Mathematics of Finance** Łukasz Stettner,2008 This volume contains 15 papers contributed by the participants of the 2nd General AMaMeF conference and Banach Center conference Advances in mathematics of finance organized in B dlewo Poland from 30th April till 5th May 2007 AMaMeF Advances Mathematical Methods of Finance is a scientific programme of the European Science Foundation for 2005 2010 Preface p 5 **Risk Management in Banking** Joël Bessis,2010 This book examines all aspects of financial risk management in banking from global considerations to the fundamental aspects of the management of a particular profit centre It deals with the very latest techniques including value at risk **Multibiometric Systems** Karthik Nandakumar,2008 Multibiometric systems are gaining popularity because they are able to overcome limitations such as non universality noisy sensor data and susceptibility to spoof attacks common in unibiometric systems We address two critical issues in the design of a multibiometric system namely fusion methodology and template security We propose a fusion methodology based on the Neyman Pearson theorem for combination of match scores provided by multiple biometric matchers The likelihood ratio LR test used in the Neyman Pearson theorem directly maximizes the genuine accept rate GAR at any desired false accept rate FAR We extend the likelihood ratio based fusion scheme to incorporate the quality of the biometric samples The LR framework can be used for designing sequential multibiometric systems by constructing a binary decision tree classifier based on the marginal likelihood ratios of the individual matchers The use of image quality information further improves the GAR to 90% at a FAR of 0 001% Next we show that the proposed likelihood ratio based fusion framework is also applicable to a multibiometric system operating in the identification mode We investigate rank level fusion strategies and propose a hybrid scheme that utilizes both ranks and scores to perform fusion in the identification scenario Fusion of multiple biometric sources requires storage of multiple

templates for the same user corresponding to the individual biometric sources Template security is an important issue because stolen biometric templates cannot be revoked We propose a scheme for securing multibiometric templates as a single entity using the fuzzy vault framework We have developed fully automatic implementations of a fingerprint based fuzzy vault that secures minutiae templates and an iris cryptosystem that secures iris code templates We also demonstrate that a multibiometric vault achieves better recognition performance and higher security compared to a unibiometric vault
