**Drug Wars and Coffeehouses** David R. Mares, 2006 An international policy issue awash in myths moral inconsistencies social prejudices and political rhetoric it s no wonder students find the international drug trade an alluring topic to study and discuss With his brief and engaging new book David Mares explores the reasons why there is so much disagreement among nations about which policies are most appropriate to address drug production distribution and trade From the more tolerant coffee house style policies of the Netherlands which focus on public health concerns to the United States just say no drug war approach nations frame and seek to resolve these issues in very different ways and with different levels of success This variation creates a host of global cooperation and policy coordination problems making Drug Wars and Coffee Houses an ideal supplement for giving students an opportunity to apply the larger themes of any political economy course to a substantive policy area A compelling framework focusing on political economic ideas and analysis shows students how leaders and policymakers need to understand the drug trade as a full blown commodity system if they are to impact its different segments As he discusses drug production consumption distribution and money laundering Mares carefully shows what insights micro political economic realist constructivist and social deviant perspectives each bring to bear on the problem And through the book s use of extended case studies this text offers students an inside look at a complex and fascinating policy area from Sweden s attempts to enforce drug war style policies to the UK s movement towards decriminalization to the responses of such international organizations as the United Nations and the European Union A
