**Corporate Madness** William D. Stinnett, Russell G. Hanson, 1990      **Synergies Created by a Strategic Fit between Business and Human Resource Strategies** Wilson J. Osito Odiyo, 2013-07-26 This text is an important addition to the ongoing discourse on strategic management particularly strategic human resource management It is a result of research carried out in the agricultural sector in general and on multinational tea firms in particular The author's hands on and conceptual insights gained through nineteen years of experience across African countries make the text a useful tool for company boards of directors and strategic level managers charged with the formulation and implementation of business and human resource strategies In addition it provides justification to HR managers of the need to shift focus from primarily being concerned with routine transactional HR activities to dealing with transformational ones which are contingent on the circumstances of the organization Scholars management consultants and management students will also find the contents of this book to be of great interest and benefit It is now sufficiently recognised that management has to be concerned with deliverables rather than abstractions Therefore many firms formulate and implement one form of business strategy or the other However strategies cannot be conceived let alone realised without human resource input The question that HR continues to grapple with therefore is how it can demonstrate the contribution of each employee to the bottom line and business sustainability How this question is to be answered has not always been explained and is even more crucial for the agricultural firms which are characterized by great instability in terms of weather patterns commodity prices currency exchange rates and wage levels HR planning in these circumstances cannot be a simple exercise but getting it right is more important than for organizations in more predictable environments This book moves away from the romanticization of the role of HRM in such organizations and instead provides empirical evidence of the types of business and human resource strategies employed strategic integration between these strategies and the strategic human resource management processes and practices used Finally it considers the concomitant synergies achieved by strategic fit between business and human resource strategies and their role in achieving sustainable competitive advantage      **Corporate Madness** Mark Lineback, 1994      **Personnel Literature**, 1993      **The New Nuclear Danger** Helen Caldicott, 2017-07-18 A global leader of the antinuclear movement delivers a meticulous urgent and shocking report on US weapons policy and the imminent dangers it poses Booklist First published in the wake of the September 11 attacks in 2001 The New Nuclear Danger sounded the alarm against a neoconservative foreign policy dictated by weapons manufacturers This revised and updated edition includes a new introduction that outlines the costs of Operation Iraqi Freedom details the companies profiting from the war and subsequent reconstruction and chronicles the rampant conflicts of interest among members of the Bush administration who also had a financial stake in weapons manufacturing Named one of the Most Influential Women of the 20th Century by the Smithsonian and nominated for the Nobel Peace Prize for her antinuclear activism Dr Helen Caldicott's expert

assessment of US nuclear and military policy is essential reading for anyone who wants to understand the precarious state of the world After eight printings in the original edition *The New Nuclear Danger* remains a singularly persuasive argument for a new approach to foreign policy and a new path toward arms reduction A timely warning at a critical moment in world history of the horrible consequences of nuclear warfare Walter Cronkite

**Narrating the Global Financial Crisis** Miriam Meissner, 2017-05-25 This book analyzes how the Global Financial Crisis is portrayed in contemporary popular culture using examples from film literature and photography In particular the book explores why particular urban spaces infrastructures and aesthetics such as skyline shots in the opening credits of financial crisis films recur in contemporary crisis narratives Why are cities and finance connected in the cultural imaginary Which ideologies do urban crisis imaginaries communicate How do these imaginaries relate to the notion of crisis To consider these questions the book reads crisis narratives through the lens of myth It combines perspectives from cultural media and communication studies anthropology philosophy geography and political economy to argue that the concept of myth can offer new and nuanced insights into the structure and politics of popular financial crisis imaginaries In so doing the book also asks if how and under what conditions urban crisis imaginaries open up or foreclose systematic and political understandings of the Global Financial Crisis as a symptom of the broader process of financialization
