Acupuncture in Latin means sticking with the needle. Each of the 409 important acupuncture points is presented with an anatomical graphic, an overview of the meridian, and a photo showing the needle placement. The combination of Chinese sources and the authors' therapeutic experiences provides a sensible balance between the most important indications and practical needs. The names, properties, and applications of the individual acupuncture points have been revised on this basis. Far Eastern healing methods and Western observation techniques create a bridge between Asian and Western views of acupuncture. This acupuncture atlas not only provides beginners with an overview of the most important acupuncture points but experienced practitioners can also learn about seldom-used acupuncture points and thus extend their knowledge. An atlas of acu points designed for bodyworkers. Includes descriptions of all acu points, their location, and their traditional use, along with charts of all twelve organ meridians and including all eight extraordinary meridians, seldom seen in acupuncture charts. Why use an acupressure atlas instead of an acupuncture atlas? Bodywork is different from needling. Acupuncture charts are designed for finding the precise location of the acupuncture points, but an acupuncturist doesn't need to know the exact location of the meridian itself. Because of this, most acupuncture charts show a simplified version of the path of the meridian. In acupressure, along with working on points, we typically trace massage along the course of a meridian to clear blockages and promote Qi flow. The Acupressure Atlas charts include the actual course of each meridian, including the branch pathways not included in most acupuncture charts. Similarly, an acupuncturist has no need to locate the six extraordinary meridians.

that have no points of their own but in acupressure it can be very helpful to trace these meridians In addition the normal method of measurement in acupuncture is the cun a measurement based on the width of the thumb at the first joint This makes sense if you are measuring where to put a needle But in acupressure we are measuring from one finger placement to another Measuring the distance between points in this way removes your fingers from the points which doesn t make sense For this reason point locations are shown in finger distances where you have your fingertips on each point Universal Cyclopaedia and Atlas Charles Kendall Adams,Rossiter Johnson,1908
