The Earth System Lee R. Kump, James F. Kasting, Robert G. Crane, 2004 The Earth System Second Edition employs a systems based approach to examine Earth science at the global level This text explores how Earth's processes have connections to the past and to each other Seemingly small scale changes to Earth can have large scale effects Processes that are occurring now are molding the course of the future The second edition incorporates two new chapters Modeling the Atmosphere Ocean System A discussion of why numerical models are necessary how they are used what they can tell us about past and future climates and what their limitations are A Focus on the Biota Ecosystems and Biodiversity Focuses on life's role in the Earth system how ecosystems function what biodiversity is and whether or not biological diversity enhances the stability of ecosystems Three categories of boxed text are included and offer a deeper study of the topics presented A Closer Look Includes more advanced concepts results from current research and explanations of interesting phenomena Important Concepts In depth presentations of fundamental concepts from the natural sciences essential to our understanding of the Earth system Thinking Quantitatively Demonstrates how simple mathematics can be used to better understand the workings of the Earth system

Earth System Law: Standing on the Precipice of the Anthropocene Timothy Cadman, Margot Hurlbert, Andrea C. Simonelli, 2021-12-13 This book systematically explores the emerging legal discipline of Earth System Law ESL challenging the closed system of law and marking a new era in law and society scholarship Law has historically provided stability certainty and predictability in the ordering of social relations predominantly between humans However in recent decades the Earth's relationship in law has changed with increasing recognition of the standing of Mother Earth inherent rights of the environment such as flora and fauna rivers and now recognition of the multiple relations of the Anthropocene This book questions the fundamental assumption that the law only applies to humans and that the earth as a system has intrinsic rights and responsibilities In the last ten years the planet has experienced its hottest period since human evolution and by the year 2100 unless substantive action is taken many species will be lost and planetary conditions will be intolerable for human civilisation as it currently exists Relationships between humans the biosphere and all planetary systems must change The authors address these challenging topics setting the groundwork of ESL to ensure sustainable development of the coupled socio ecological system that the Earth has become Earth System Law is an interdisciplinary and transdisciplinary research project and as such this book will be of great interest to researchers and stakeholders from a wide range of disciplines including political science anthropology economics law ethics sociology and psychology
