Sophie Cluet, Rick Hull, 1998-07-29 This book constitutes the thoroughly refereed post workshop proceedings of the 6th International Workshop on Database Programming Languages DBPL 6 held in Estes Park Colorado USA in August 1997 The 20 revised full papers presented have gone through two rounds of reviewing and selection Also included are two invited talks the transcription of a panel discussion and an introductory survey by the volume editors The papers address all current aspects of database programming languages in particular spatial databases typing query languages for new applications views expressive power aggregate queries cooperative work and transactions

Database Programming Languages (DBPL-4) Catriel Beeri, Atsushi Ohori, Dennis Shasha, 2013-06-29 The Fourth International Workshop on Database Programming Languages Object Models and Languages DBPL 4 took place in Manhattan New York City 30 August 1 September 1993 The areas of interest and the format of DBPL 4 focused on the integration of programming languages object models type systems and database systems As in the previous DBPL workshops the setting was informal allowing the participants to actively discuss and argue about the ideas presented in the talks The comments and remarks made by the participants during and after the presentations were taken into account in the preparation of the final versions of the papers The result we believe is a set of excellent papers The DBPL sequence is closely related to the sequence of International Workshops on Persistent Object Systems POS first started in 1985 While the DBPL workshops focus on language and model issues the POS workshops have focused on implementation issues thus the two sequences complement each other Many researchers participate in both workshop series The eight sessions of the technical program of DBPL 4 were as follows 1 Bulk types and their query languages two sessions 2 Object models and languages 3 Data types with order 4 Mechanisms to support persistence reflection and extensibility 5 Query optimization and integrity constraints 6 Logic based models 7 Implementation and performance issues
