Assumption Of Death:

Presumption of Death from Absence Harry Morton Gross,1928 **Well-Being and Death** Ben Bradley,2009-03-05
Ben Bradley investigates what is good about life and what is bad about death He argues that pleasure is what makes life go well and that death is bad for its victim even though the victim ceases to exist because it deprives him of a continuing good life Bradley considers intriguing related questions including how death can be made less bad **The Metaphysics and Ethics of Death** James Stacey Taylor,2013-10-03 The questions that surround death Is death a harm to the person who dies Should we be afraid of death Can the dead be harmed Can they be wronged have been of widespread interest since Classical times This interest is currently enjoying a renaissance across a broad spectrum of philosophical fields ranging from metaphysics to bioethics This volume is the first to bring together original essays that both address the fundamental questions of the metaphysics of death and explore the relationship between those questions and some of the areas of applied ethics in which they play a central role The essays in Part I of this volume examine some of the Classical approaches to fundamental metaphysical questions surrounding death addressing in particular the question of whether a person s death can be a harm to her The theme of the value of death is continued in Part II with essays addressing this issue through a more contemporary lens The essays in Part III address the related but separate issue of whether persons can be harmed by events that occur after they die Finally the essays in Part IV apply the metaphysical issues addressed in Parts I through III to various issues in bioethics including the question of posthumous organ procurement suicide and survival after brain injury Written by some of the most prominent philosophers working on these issues today the essays in this volume showcase the state of the art of both the metaphysics of death and its importance to many areas of applied ethics The Employers' Liability Acts and the Assumption of Risks in New York, Massachusetts, Indiana, Alabama, Colorado, and England Frank Farnum Dresser,1908

Shneidman,1980 One of the most impressive facts about death today is how much and in how many different ways various aspects of death and dying are undergoing dramatic changes Edwin Shneidman has compiled this volume to give the reader a broad ranging view of current trends in thanatology The result is a remarkable compendium of pertinent insights upon which to build an understanding of death in our time death as it relates to our comprehension of ourselves and our fellow beings Edwin S Shneidman Ph D was Professor of Thanatology the study of death and its surrounding circumstances as in forensic medicine and Director of the Laboratory for the Study of Life Threatening Behavior at the University of California at Los Angeles **The Apocrypha and Pseudepigrapha of the Old Testament in**
