Drivers Ed:

Driver's Ed Caroline B. Cooney, 2012-08-29 The universal experience for most high school students is learning to drive and getting their driver's license. Add breathlessly plotted romance and an accident and you have a poignant and realistic novel. Remy Martin prays to the God of Driver's Education that she will get to drive today. She doesn't know where she's going but she knows one thing she is going to get there fast. Morgan Campbell had been standing on the threshold of 16 and getting his driver's license ever since he could remember. But deep into the first crush of his life thinking of nothing but girls, Morgan forgot what driving was all about. This poignant novel about responsibility and consequences is as convincing as it is irresistible.

The Young Driver Safety Institute Proactive-Predictive Training Document Pack Christian R. Komor,2012-02-01 Driving is the most dangerous activity most of us will ever do In a few seconds the thin line between life and death can be crossed In this unique program based on exhaustive best practices research The Young Driver Safety Institute provides readers with the skilled guidance and critical information needed to conduct an effective home based driver s instruction course Using the new proactive predictive driving format the YDSI Workbook is filled with the forms inventories and informational handouts you need to train yourself a teen or a senior driver struggling to maintain their license There are three very unique elements of the YDSI program First we begin with the assumption that government authorities and public and private drivers training companies do not have the time or resources to actually teach more than the very minimal skills and information needed to operate a motor vehicle What happens then is that it falls to caregivers in the case of new drivers and caregivers in the case of elderly drivers working to maintain a license to provide the hundreds of hours of on road training needed For this they are almost always unequipped and must rely upon their on road experiences which have most likely been negative Most of us tend to follow the leader when driving which results in a dumbing down effect a regression toward the mean in driving technique which is generally quite low in this country Second we have developed our program working from an exhaustive and ongoing review of the relevant research and then reverse engineering targeted strategies for training drivers to avoid or prevent the major causes of car crashes Third the techniques which we have developed as outlined in this Document Pack and the accompanying Workbook are to a large degree unique in the driver s training field Working outward from the research and then honing the techniques developed from there has allowed us a unique perspective on driving and how to train drivers you will not find elsewhere This Document Pack of forms inventories and informational handouts comprises the backbone of the YDSI Proactive Predictive Driving Program It is intended to be used along with the YDSI Proactive Predictive Training Workbook Teen or Senior version and a formal drivers training course and an extended period of on road caregiver coaching for teen readers You are welcome to skip ahead at any time to the documents The discussion that follows provides a further description of the Young Driver Safety Institute and the state of drivers training today Driverthink Frank Miller,2009-06 Driverthink is not just another Go Slow Safe Driving guidebook Within its pages are reality based driving tips ideas and suggestions that can literally save your life For too long the focus on safe driving has been to expound Politically Correct driving concepts that simply don t take into account the Reality of driving a vehicle at high speed on modern roads and highways Otherwise responsible people don t suddenly shed their responsibility when they slip behind the wheel But they don t often really think about their driving either Thus the title Driverthink In order to be responsible safe drivers we need to think about our driving We need to know our machines know our limitations maximize our driving skills and gain driving experience as quickly as possible Driverthink breaks new ground by exploring each of these areas in lively entertaining detail Drive Fast or Drive Slow but Driverthink when you drive Driverthink is a collection of articles from the

popular blog of the same name Written in a lively and entertaining style each of the articles explore specific driving situations or issues in detail offering driving tips ideas and suggestions on how to deal with the different situations Driverthink is an excellent review for the seasoned driver and a must read for the newer less experienced driver Driverthink would suggest that Speed may kill but unskilled driving can definitely kill Does the average driver even know what over steer or under steer are Do they know what kind of rear suspension they re driving on Do they really understand how these most basic driving concepts will affect the handling of their vehicles especially in an emergency situation Driving on our roads and highways must be about reality It is dealing with that reality that will keep us alive Following standard issue politically correct advice offered by those with limited skills and no appreciation for the realities of driving simply doesn t create safer driving Just Slow Down might not be the best advice on a highway where even the slow lanes are doing limit plus ten High speed rear end accidents can really ruin the day and excessively slow driving will most surely restrict traffic flow Perhaps it s not the best advice after all Driverthink is a most serious effort by the author to start really saving lives on our Highways and Byways It will help you to become a much safer Driverthink driver It may even save your life [I'm Still Here J.](#)
