Asteroid Strikes:

What If an Asteroid Hit Earth? Holly Cefrey, 2002 This series will make readers wonder what might happen if particular events occurred Grounded in fact each book assesses the possibility or threat of an event from melting ice caps to a fuel shortage Each book also offers suggestions on how to respond to these environmental and ecological challenges before it is too late

Comet/Asteroid Impacts and Human Society Peter T. Bobrowsky, Hans Rickman, 2007-06-10 Leading specialists in various disciplines were first invited to a multidisciplinary workshop funded by ICSU on the topic to gain a better appreciation and perspective on the subject of comet asteroid impacts as viewed by different disciplines This volume provides a necessary link between various disciplines and comet asteroid impacts

Asteroid Impact Lisa Owings, 2019-08-01 The Earth is constantly bombarded with space matter Most burns up before it reaches the surface But what if a giant asteroid was headed our way In this high interest title the end of the world becomes a reality as a massive asteroid strikes Earth Readers can put themselves in the line of impact with a narrative opening and discover if any asteroids are on course to collide with Earth anytime soon Features follow the chain reaction of an asteroid impact and examine past asteroid impacts Would we be able to save ourselves

Asteroids Impacts, Crustal Evolution and Related Mineral Systems with Special Reference to Australia Andrew Y. Glikson, Franco Pirajno, 2018-03-12 This book presents a comprehensive overview of Australian impact structures and related mineralization including a discussion of the significance of many of these structures for crustal evolution The book focuses in particular on Archaean impact ejecta fallout units in the Pilbara Craton of Western Australia large exposed and buried impact structures and on the geophysical evidence for possible to probable impact structures Thanks to their long term geological stability Precambrian and younger terrains in the Australian continent contain 38 confirmed impact structures and 43 ring and dome structures many of which constitute possible to probable asteroid impact structures The impact structures have been the subject of more than half a century of studies and range from several tens of meter large craters to buried structures larger than 100 km in diameter Discoveries of impact fallout units in the Pilbara Craton have defined the Pilbara as one of the two best documented terrains where Archaean impact ejecta fallout deposits are identified the other terrain being the Kaapvaal Craton in southern Africa A synthesis of evidence from both cratons indicates periods of large asteroid bombardments during 3 47 2 48 billion years ago including peak bombardment about 3 25 3 22 billion years ago The latter period coincides with an abrupt transformation of an early Archaean granite greenstone crust to mid to late Archaean semi continental crustal regimes underpinning the significance of heavy asteroid impact events for crustal evolution Apart from proven impact structures Australian terrains display a range of circular features including morphological and drainage rings circular lakes volcanic craters tectonic domes oval granite bodies mafic igneous plugs salt diapirs and magnetic gravity and seismic anomalies many of which are of a likely impact origin Thermal and hydrothermal processes associated with impact cratering bear important consequences for the

formation of mineral deposits such as Ni at Sudbury Pb Zn at Siljan and Kentland Impact structures may also provide sites for the accumulation of hydrocarbons whereas in some instances fracturing associated with impact structures allows outward migration of oil and gas

Impact! Gerrit L. Verschuur, 1996 Until recently collisions between the Earth and a comet were thought to be so rare that the threat to life on Earth from such objects was dismissed as being too unlikely to worry about This book shows the threats and precarious nature of life here *The Asteroid Impact Connection of Planetary Evolution*

Andrew Y. Glikson, 2013-03-25 When in 1981 Louis and Walter Alvarez the father and son team unearthed a tell tale Iridium rich sedimentary horizon at the 65 million years old Cretaceous Tertiary boundary at Gubbio Italy their find heralded a paradigm shift in the study of terrestrial evolution Since the 1980s the discovery and study of asteroid impact ejecta in the oldest well preserved terrains of Western Australia and South Africa by Don Lowe Gary Byerly Bruce Simonson Scott Hassler the author and others and the documentation of new exposed and buried impact structures in several continents have led to a resurgence of the idea of the catastrophism theory of Cuvier previously largely supplanted by the uniformitarian theory of Hutton and Lyell Several mass extinction of species events are known to have occurred in temporal proximity to large asteroid impacts global volcanic eruptions and continental splitting Likely links are observed between asteroid clusters and the 580 Ma acritarch radiation end Devonian extinction end Triassic extinction and end Jurassic extinction New discoveries of 3.5 Ga old impact fallout units in South Africa have led Don Lowe and Gary Byerly to propose a protracted prolongation of the Late Heavy Bombardment 3.95-3.85 Ga in the Earth Moon system Given the difficulty in identifying asteroid impact ejecta units and buried impact structures it is likely new discoveries of impact signatures are in store which would further profoundly alter models of terrestrial evolution [Asteroid Impact Risk](#) Josep M. Trigo-Rodríguez, 2022-03-08

This book describes the complexity of impact hazards associated with asteroids and comets The challenge in this regard lies in the heterogeneous nature of these bodies that endanger our planet which is why we are conducting new experiments to better understand their unique physicochemical properties Several generations of astronomers have tracked and mapped the orbits of asteroids and comets over the past few centuries and telescopic surveys have only begun to discover new interstellar objects In addition cutting edge software allow our computers to combine the orbits of these elusive bodies to study how they evolve over time and seek to match asteroid complexes as fragments of asteroidal and cometary disruptions Impact hazards represent one of the greatest threats to the survival of human beings in the medium term Geological studies show that the stratigraphic record holds clear geological evidence of these rare but transcendental encounters in the history of life on our planet The study and quantification of past catastrophes can give us clues to face future challenges in the form of potential impacts Further it would be illogical to assume that Earth's interaction with space is limited to major impacts Every night Earth is struck by millions of particles and dozens of meteor showers occur around the globe every year The study of lake and ocean sediments reveals the magnitude of the continuous contribution of interplanetary matter reaching

Earth roughly 100 000 tons per year Accordingly the goal of this book is to underscore the need for society wide awareness of the dangers associated with asteroid and comet impacts on the basis of scientific evidence and with no intention of sparking alarmism After all we ourselves may only be the fruit of an opportunity given to mammals sixty five million years ago to evolve after the conflagration that would be the downfall of the dinosaurs If we have learned to read Earth s geological history we should consider ourselves a very fortunate species and its teachings should equip us to face this problem The also book emphasizes the role of space missions to gain insights on these bodies particularly describing the relevance of the DART NASA and Hera ESA missions to deflect and study Dimorphos respectively the small satellite of the Didymos binary asteroid

Semper Human Ian Douglas,2009-05-26 The final conflict Chaos has erupted throughout the known galaxy threatening countless colonies and orbital habitats as the Associative struggles vainly to keep the peace Extreme measures are called for in these times of dire crisis and the Star Marines are awakened from their voluntary 850 year cybe hibe sleep But General Trevor Garroway and his warriors are about to discover that the old rules of engagement have drastically changed The end begins with an old style assault on rebels at the Tarantula Stargate But true terror looms at the edges of known reality Humankind s eternal enemy the brutal unstoppable Xul approaches wielding a weapon monstrous beyond imagining Suddenly not only is the future in jeopardy but the past is as well and if the Marines fail to eliminate their relentless xenophobic foe once and for all the Great Annihilator will obliterate every last trace of human existence **Meteor** Alex

Woolf,2014-07-01 What is it like to witness a meteor This book looks at the Chelyabinsk Meteor and other asteroid strikes using firsthand accounts to describe events and people s experiences providing multiple perspectives from eyewitnesses survivors the emergency services scientists and the media Provided by publisher Near-earth Objects John L. Remo,1997 The primary focus of 47 papers from an April 1995 meeting is directed toward the need for gathering and interpreting scientific data to understand the Earth s past history evaluate current astronomical observations and outline future exploration missions to NEOs Sections on astronomy earth and planetary sciences astronautics detection and mitigation and UN issues can be thought of as a continuation of those contained within the foundation volume Hazards Due to Comets and Asteroids which summarizes most of the preceding work in NEOs and serves as a starting place for those interested in the study of NEOs and their possible interaction with the Earth No index Annotation copyrighted by Book News Inc Portland OR
