Alessandro Vatri, 2017-02-16 This study discusses the question of whether there is a linguistic difference between classical Attic prose texts intended for public oral delivery and those intended for written circulation and private performance Identifying such a difference which exclusively reflects these disparities in modes of reception has proven to be a difficult challenge for both literary scholars and cultural historians of the ancient world with answers not always satisfactory from a methodological and an analytical point of view The legitimacy of the question is first addressed through a definition of what such slippery notions as orality and oral performance mean in the context of classical Athens reconstruction of the situations in which the extant prose texts were meant to be received and an explanation of the grounds on which we may expect linguistic features of the texts to be related to such situations The idea that texts conceived for public delivery needed to be as clear as possible is substantiated by available cultural historical and anthropological facts however these do not imply that the opposite was required of texts conceived for private reception In establishing a rigorous methodology for the reconstruction of the native perception of clarity in the original contexts of textual reception this study offers a novel approach to assessing orality in classical Greek prose through examination of linguistic and grammatical features of style It builds upon the theoretical insights and current experimental findings of modern psycholinguistics providing scholars with a new key to the minds of ancient writers and audiences Babylonian Poems of Pious Sufferers Takayoshi

Oshima, 2015-02-12 Takayoshi Oshima analyses the two most important Babylonian wisdom texts Ludlul Bel Nemeqi also known as the Babylonian Job or the Babylonian Righteous Sufferer and the so called Babylonian Theodicy On the basis of the hitherto published as well as newly available unpublished cuneiform manuscripts the author establishes a new critical text for each poem and gives an English translation He offers detailed philological and critical notes to the texts discussing both

the textual and the interpretive issues evoked by individual words and passages In addition however each poem is preceded by a lengthy discussion of its origins intention and plot as well as by more general considerations of its cultural and historical background including short but important observations on the relationship to Old Testament wisdom literature
