Mazur, 2022-05-05 *Gender Equality and Policy Implementation in the Corporate*

World takes a unique approach to the issue of gender equality in corporations in the 21st century. It examines the implementation of specific policies that seek to promote women's presence on corporate boards in 15 democracies in Western and Central Eastern Europe, North America, and Australasia through the lens of the Gender Equality Policy in Practice Approach. The thirteen empirically rich country chapters by leading country experts and two separate comparative chapter answer core questions: How were policies adopted and implemented? Did they achieve any degree of success that would allow for real and lasting equality? What were the politics of the pursuit of corporate gender equality across the 15 countries? What worked and did not work, and why? What are the lessons to be drawn from these experiences? The findings of the book show that policy implementation does matter, but that in this last bastion of male domination, policies have had more success in increasing women's numbers over challenging gender-biased norms that block women of all cultural and socio-economic backgrounds from gaining real power on boards. The path-breaking study shows that the reasons for this slow change are highly complex and case-specific in the details of each policy mix. While progress has been slow in coming, it has still been made even in these challenging times. Future policy success, the book concludes, is in the hands of men and women willing to come forward to overcome these well-entrenched obstacles.

New Perspectives on Political Economy and Its History Maria Cristina Marcuzzo, Ghislain Deleplace, Paolo Paesani, 2020-05-13

This Festschrift is published in honour of Annalisa Rosselli, a political economist and historian of economic thought whose academic activity has promoted unconventional ways of thinking throughout her career. A renowned list of scholars articulate and respond to this vision through a series of essays leading to an advocacy of pluralism and critical thinking in political economy. The book is split into five parts, opening with a section on new topics for the history of economic thought, including new perspectives in gender studies and an illustration of the fecundity of the link with economic history. This is followed by sections that address relevant perspectives on the Classical approach to distribution and accumulation, Ricardo's interpretation of Sraffa, and the legacy of Keynes. This book will appeal to students interested in reforming economics, as well as academics and economists interested in political economy and the history of economic thought.

State-Society Relations around the World through the Lens of the COVID-19 Pandemic Federica Duca, Sarah Meny-Gibert, 2023-12-04

The collection examines state-society relations during the COVID-19 pandemic from governance at the outset of the pandemic to vaccine rollouts via a series of case studies from around the world. With a focus on the Global South, the book includes chapters on the experiences of Angola, Zimbabwe, South Africa, Bolivia, Argentina, Brazil, Jamaica, and Indonesia, as well as contributions from the Global North on Sweden, Canada, Czech Republic, and New Zealand. The collection demonstrates that the effects of the pandemic can only be properly revealed by looking at the regional and local contexts in which states and societies experienced it. Contributors examine themes such as the nature of contemporary democracy, state capacity, the legitimacy of state

institutions and trust in government questions of social solidarity and forms and impacts of inequality Focusing on national or sub national cases each chapter analyses the underlying forces and structures revealed when the authority of the state is brought to bear on the agency of citizens under emergency conditions In doing so contributors embed analysis of pandemic governance in the historical context of each country or region highlighting how political choices histories of the state s treatment of citizens and the orientations of a region s elites shaped the actions taken by the state The book will be of interest to those looking to understand how the pandemic was interpreted accepted or contested at the local national or sub national level and to those interested in state society relations more generally It will appeal to scholars and students interested in questions of pandemic government from a social scientific point of view and especially to those interested in perspectives from the Global South

Race, Gender, and Political Representation Beth Reingold,Kerry Lee Haynie,Kirsten Widner,2021 It is well established that the race and gender of elected representatives influence the ways in which they legislate but surprisingly little research exists on how race and gender interact to affect who is elected and how they behave once in office This book takes up the call to think about representation in the United States as intersectional and it measures the extent to which political representation is simultaneously gendered and raced Drawing on original data on the presence policy leadership and policy impact of Black women and men Latinas and Latinos and White women and men in state legislative office in the late twentieth and early twenty first centuries this book demonstrates what an intersectional approach to identity politics can reveal
