A Realist Conception Of Truth:

A Realist Conception of Truth William P. Alston, 2018-10-18 One of the most important Anglo American philosophers of our time here joins the current philosophical debate about the nature of truth William P Alston formulates and defends a realist conception of truth which he calls alethic realism from aletheia Greek for truth This idea holds that the truth value of a statement belief or proposition depends on whether what the statement is about is as the statement says it is Michael Dummett and Hilary Putnam are two of the prominent and widely influential contemporary philosophers whose anti realist ideas Alston attacks

Music Alone Peter Kivy, 1990 What makes a musical work profound What is it about pure instrumental music that the listener finds attractive and rewarding In addressing these questions Peter Kivy continues his highly regarded exploration of the philosophy of musical aesthetics He considers here what he believes to be the most difficult subject of all just plain music music unaccompanied by text title subject program or plot in other words music alone

The Nature of Truth, second edition Michael P. Lynch, Jeremy Wyatt, Junyeol Kim, Nathan Kellen, 2021-03-16 The definitive and essential collection of classic and new essays on analytic theories of truth revised and updated with seventeen new chapters The question What is truth is so philosophical that it can seem rhetorical Yet truth matters especially in a post truth society in which lies are tolerated and facts are ignored If we want to understand why truth matters we first need to understand what it is The Nature of Truth offers the definitive collection of classic and contemporary essays on analytic theories of truth This second edition has been extensively revised and updated incorporating both historically central readings on truth s nature as well as up to the moment contemporary essays Seventeen new chapters reflect the current trajectory of research on truth

Wittgenstein's Account of Truth Sara Ellenbogen, 2012-02-01 Wittgenstein s Account of Truth challenges the view that semantic antirealists attribute to Wittgenstein that we cannot meaningfully call verification transcendent statements true Ellenbogen argues that Wittgenstein would not have held that we should revise our practice of treating certain statements as true or false but instead would have held that we should revise our view of what it means to call a statement true According to the dictum meaning is use what makes it correct to call a statement true is not its correspondence with how things are but our criterion for determining its truth What it means for us to call a statement true is that we currently judge it true knowing that we may some day revise the criteria whereby we do so

The Correspondence Theory of Truth Andrew Newman, 2002-06-24 This work presents a version of the correspondence theory of truth based on Wittgenstein s Tractatus and Russell s theory of truth and discusses related metaphysical issues such as predication facts and propositions Like Russell and one prominent interpretation of the

Tractatus it assumes a realist view of universals Part of the aim is to avoid Platonic propositions and although sympathy with facts is maintained in the early chapters the book argues that facts as real entities are not needed It includes discussion of contemporary philosophers such as David Armstrong William Alston and Paul Horwich as well as those who write about propositions and facts and a number of students of Bertrand Russell It will interest teachers and advanced students of philosophy who are interested in the realistic conception of truth and in issues in metaphysics related to the correspondence theory of truth and those interested in Russell and the Tractatus

Truth and Speech Acts Dirk Greimann, Geo Siegwart, 2013-09-05 Whereas the relationship between truth and propositional content has already been intensively investigated there are only very few studies devoted to the task of illuminating the relationship between truth and illocutionary acts This book fills that gap This innovative collection addresses such themes as the relation between the concept of truth and the success conditions of assertions and kindred speech acts the linguistic devices of expressing the truth of a proposition the relation between predication and truth

Realism & Antirealism William P. Alston, 2002 Throughout the past century a debate has raged over the thesis of realism and its alternatives In this volume of original essays a group of philosophers explores the ongoing controversy

Religious Truth and Religious Diversity Nathan S. Hilberg, 2009 Interpreting religion poses a dilemma realist interpretations of religion face the philosophical problem of religious diversity and irrealist interpretations of religion are revisionary The author explores the implications of this dilemma and also clarifies the confusions caused by two abiding problems those stemming from first the concern over which religious beliefs are true rather than attending to what it means for a belief to be true and second the failure to acknowledge two fundamentally different forms of religious irrealism anti realism and non realism Providing critical assessment of the relevant works of John Hick William Alston Alvin Plantinga Peter van Inwagen and Ludwig Wittgenstein and his followers this book is appropriate for upper level undergraduate and graduate courses in philosophy of religion and religious theory

Truth and Objectivity Crispin Wright, 2009-07-01 Crispin Wright offers an original perspective on the place of realism in philosophical inquiry He proposes a radically new framework for discussing the claims of the realists and the anti realists This framework rejects the classical deflationary conception of truth yet allows both disputants to respect the intuition that judgments whose status they contest are at least semantically fitted for truth and may often justifiably be regarded as true In the course of his argument Wright offers original critical discussions of many central concerns of philosophers interested in realism including the deflationary conception of truth internal realist truth scientific realism and the theoreticity of observation and the role of moral states of affairs in explanations of moral beliefs

Realism and the Correspondence Theory of Truth Richard Fumerton, 2002-04-25 This book is a defense of realism about truth The author argues that the most plausible version of realism is a correspondence theory of Truth that takes thought as

the primary bearer of truth value Anti realists about Truth have seemed to argue that one cannot make sense of a world of truth makers that exists independently of representations of that world While it may be true that there is no Truth without minds one still needs the category of representation independent fact the author argues to serve as truth maker In embracing this form of realism the author does not want to deny the critical role that mind through its representations plays in structuring the reality that exists independently of those representations Furthermore after distinguishing realism about Truth from various sorts of metaphysical realisms the author suggests that one can embrace much of anti realist rhetoric from within the framework of a variety of plausible claims about the way in which minds do and must represent the world
