Aggressive Child:

Aggression and Antisocial Behavior in Children and Adolescents Daniel F. Connor, 2012-04-19 This comprehensive volume reviews and synthesizes a vast body of knowledge on maladaptive aggression and antisocial behavior in youth. Written from a clinical developmental perspective and integrating theory and research from diverse fields, the book examines the origins, development, outcomes, and treatment of this serious problem in contemporary society. Major topics addressed include the types and prevalence of aggressive and antisocial behavior, the interplay among neuropsychiatric, psychosocial, and neurobiological processes in etiology, known risk and protective factors, gender variables, and why and how some children grow out of conduct disturbances. Chapters also discuss current approaches to clinical assessment and diagnosis and review the evidence for widely used psychosocial and pharmacological interventions.

Understanding Aggressive Behavior in Children Craig F. Ferris, Thomas Grisso, 1996 In this work, figures in the field of childhood aggression share what is known about the cultural, biological, and psychological roots of violence and develop intervention strategies to deal with the needs of young people. Coverage includes clinical assessment and treatment of children with inappropriate aggressive behaviour, socioenvironmental factors that contribute to inappropriate aggressive behaviour, behavioural and neurobiological consequences of environmental and emotional insults, neurochemical control of aggression, and the moral and ethical implications of psychopharmacology in children and psychosocial intervention strategies for helping children who are excessively aggressive.

Helping Children with Aggression and Conduct Problems Michael L. Bloomquist, Steven V. Schnell, 2002-04-17 Comprehensive and up to date, this book belongs on the desks of practitioners, students, researchers, and policymakers in clinical child school and developmental psychology, child and adolescent psychiatry, and social work, as well as others working with children and families at risk.

Social Development in Young Children Wendy Conklin Roedell, Ronald G. Slaby, Halbert B. Robinson, 1976

Behavioral Approaches for Children and Adolescents Philip C. Kendall, Jan H. Slavenburg, Henk P.J.G. van Bilsen, 2013-11-09 Challenges for the next decade as the subtitle of a book is a statement of ambition. In the present time, we have to be ambitious as scientists, clinicians, and teachers. Without ambition, we would not be able to confront the problems of young people in an effective way. In this decade, we can see an abundance of problems of young people: football hooliganism, school drop out, vandalism, delinquency, lack of social skills, aggression, and depression. The problem seems to grow. Governments, parents, and concerned citizens call for action now. Unfortunately, the action that is taken is often impulsive and not based on scientifically proven methods: longer jail sentences for young first offenders, putting young offenders in military look-alike training camps, etc. For some reason, the usage of effective interventions is limited. In this book, the reader will find an extensive overview of what we know to be effective as a cure or prevention for the above-mentioned problems. The first four chapters will give the reader a clear insight of what the state of the art is today: overview of cognitive behavioural therapies with children and adolescents is given by

Kendall Panichelli Mindel and Gerow Russo and Navalta providesome new dimensions ofbehavior analysis and therapy What behavioral approaches can offer to education is described by Slavenburg and van Bilsen in two chapters In Part II authors from Australia the United States and the Netherlands describe programs for specific clinical populations attention deficit disorder anti social youth learning problems social skills problems depression and aggression Helping Children Cope with Trauma Ruth Pat-Horenczyk,Danny Brom,Juliet M. Vogel,2014-01-21 Helping Children Cope with Trauma bridges theory and practice in examining emerging approaches to enhancing resilience and treating traumatised children Adopting a child centred perspective it highlights the importance of the synergy between individual family community and social interventions for recovery from post traumatic stress Consisting of chapters by an international range of contributors the book is presented in three sections reflecting the ecological circles of support that facilitate healthy development in the face of traumatic circumstances Section 1 Individual addresses the impact of exposure to trauma and loss on post traumatic adaptation focusing on biological aspects attachment patterns emotion regulation and aggressive behaviour in children Section 2 Family looks at the concept of family resilience the impact of trauma on playfulness in toddlers and parents innovative models for working with children traumatised by war domestic violence and poverty and describes the challenges faced by refugee families in the light of intergenerational transmission of trauma Section 3 Community broadly explores the concept of community resilience and preparedness the centrality of the school in the community during times of war and conflict post traumatic distress and resilience in diverse cultural contexts and the impact of trauma work on mental health professionals who live and work in shared traumatic realities The book concludes with a theoretical discussion of the concept of Survival Mode as an organisng principle for understanding post traumatic phenomena Helping Children Cope with Trauma will provide mental health professionals child welfare workers educators child development experts and researchers with a thorough understanding of the needs of children after trauma and how those needs may best be met The Psychology of Aggression Arnold H. Buss,1961 *Sexually Aggressive Children* Sharon Araji,1997-08-04 Accessible and sensitive this book provides a comprehensive overview of sexual abuse perpetrated by children 12 years old and younger Drawing attention to this frequently overlooked population the author explores the familial extrafamilial and situational factors conducive to various types of sexual abuse by children so young For professionals and researchers having to consider sexually aggressive acts by children as young as two or three this book examines the theories and frameworks used to explain this kind of behaviour and outlines their associated social and psychological characteristics Sharon KAraji identifies nine programmes and practices designed by therapists treating individuals families and groups deali **How to Raise Kids You Want to Keep** Jerry Day,2006-10 A daily challenge for today s parents is incorporating positive discipline techniques and practices that put an end to temper tantrums defiance and meltdowns Dr Jerry Day helps parents develop practical methods that teach children a fundamental attribute how to willingly live under authority His successful methods are based on four key
