Identifying and Supporting Children with Specific Learning Difficulties Pamela Deponio, Christine Macintyre, 2003-12-16 Many children experience difficulties which impact on their learning at home and school. Some children are considered to have a specific learning difficulty such as dyslexia or dyspraxia, but other children display a range of indicators which cross the boundaries of specific named conditions. If teachers are to offer appropriate support, the authors of this highly practical book argue that they must look beyond the label to assess the whole child. This is an informative book which encourages teachers to consider children as individuals rather than attempting to match them to existing sets of indicators. It pinpoints the overlap of indicators within different specific learning difficulties, considers the process of assessment, explains the implications of the children's difficulties, offers tried and tested strategies to promote inclusive learning. Teachers, teaching assistants, Special Educational Needs Coordinators and students undertaking teacher education courses will all find this a refreshingly accessible book. **Children with Specific Learning Difficulties** Paula Tansley, John Panckhurst, 1984
