## **Air Quality:**

Air quality Great Britain: Parliament: House of Commons: Environmental Audit Committee,2011-11-14 Dangerous levels of particulate matter PM2.5 or PM10 and chemicals such as NO2 in the air are contributing to tens of thousands of early deaths every year in UK cities Yet the Committee found that Ministers appear to be actively trying to dilute safety standards to avoid EU fines 30 000 deaths in the UK were linked to air pollution in 2008 with 4 000 in London alone But business plans produced by the Department for Transport and Defra do not even mention air quality despite a commitment in the Coalition agreement to work towards full compliance with EU air quality standards The Government will be able to pass EU fines for air pollution breaches to local authorities subject to new procedures in the Localism Bill However this report raises a number of concerns about the ability of councils to tackle this problem without coordination and assistance from central Government and points out that the causes of poor air quality are often beyond an individual authority's control The committee is calling on the Government to establish a national framework of low emissions zones to help local authorities reduce traffic pollution It is also urging Ministers to launch a public awareness campaign to drive air quality up the political agenda Under European Union air quality laws the daily pollution levels of PM10 must not be above the legal limit on more than 35 days in a year By the 21 April 2011 London had already exceeded this year's target according to the Campaign for Clean Air in London

**Design and Protocol for Monitoring Indoor Air Quality** Niren Laxmichand Nagda,Jerome P. Harper,1989 The book is derived from a symposium prompted by the growing concern for air quality in homes offices and schools and the need for better design of investigations about indoor air quality problems and solutions Numerous chemical and physical factors influence the indoor concentrations of contaminants The multiplicity of these factors makes the investigation design process complex So well conceived designs and protocols form a crucial starting point for successful measurement programs Design of a study relates to developing a general strategy or approach protocols refers to specific procedures to be followed in conducting a study This document aims to provide information on designs and protocols used in different types of indoor air quality monitoring studies and to supply learning opportunities through shared experience
