Children's Rights Law in the Global Human Rights Landscape Eva Brems, Ellen Desmet, Wouter Vandenhoele, 2017-04-21 Children's rights law is often studied and perceived in isolation from the broader field of human rights law. This volume explores the inter-relationship between children's rights law and more general human rights law in order to see whether elements from each could successfully inform the other. Children's rights law has a number of distinctive characteristics such as the emphasis on the best interests of the child, the use of general principles and the inclusion of third parties (e.g. parents and other care takers) in treaty provisions. The first part of this book questions whether these features could be a source of inspiration for general human rights law. In part two the reverse question is asked: could children's rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders such as women, persons with disabilities, indigenous peoples or older persons? Finally, the interaction between children's rights law and human rights law and the potential for their isolation, inspiration or integration may be coloured or determined by the thematic issue under consideration. Therefore, the third part of the book studies the interplay between children's rights law and human rights law in the context of specific topics: intra-family relations, LGBTQI marginalization, migration, media, the environment and transnational human rights obligations.

Whose Kids Are They Anyway? Raymond R. Roberts, 2010-11-01. Raymond R. Roberts makes a liberal's case for teaching religion and morality in public schools by first examining the intersection of religion and public education. He shows how proposals for moral education in public schools are shaped by definitions of religion. He argues that the public education's critics overstate the failures of public education because they examine public schools in isolation from negative trends in the family, the economy, the media, etc. From there, he describes how a theory of spheres of influence gives us a better perspective from which to understand public education, including its relationship with religion.
