It then goes on to look at the demise of so called iron rice bowl policy once dominated by a Soviet inspired Personnel Management model to one now characterized by possibly Japanese as well as Western influenced HRM albeit with what are widely described as Chinese characteristics. Finally it concludes with a comparative analysis of the contributions in the book on China vis a vis an appraisal of these with the national HRM systems of Japan and South Korea. This volume was previously published as a special issue of the International Journal of Human Resource Management.
