Gottinger, 2012-12-06 In this book I develop a theory of complexity for economics and management sciences This book is addressed to the mathematically or analytically oriented economist psychologist or management scientist It could also be of interest to engineers computer scientists biologists physicists and ecologists who have a constant desire to go beyond the bounds of their respective disciplines The unifying theme is we live in a complex world but how can we cope with complexity If the book has made the reader curious and if he looks at modelling problem recognition and problem solving within his field of competence in a more complex way it will have achieved its goal The starting point is the recognition that complexity is a well defined concept in mathematics e.g. in topological dynamics computer science information theory and artificial intelligence But it is a rather diffuse concept in other fields sometimes it has only descriptive value or even worse it is only used in a colloquial sense The systematic investigation of complexity phenomena has reached a mature status within computer science Indices of computer size capacity and performance root ultimately in John von Neumann's paradigmatic model of a machine though other roots point to McCulloch and Pitts not to forget Alan Turing Offsprings of this development include complexity of formal systems and recursiveness cellular automata and the theory of self-reproducing machines theory of program or computational complexity theory of sequential machines problem solving cognitive science pattern recognition and decision processes **Joint Cognitive Systems** Erik Hollnagel, David D. Woods, 2005-02-28 Nothing has been more prolific over the past century than human machine interaction Automobiles telephones computers manufacturing machines robots office equipment machines large and small all affect the very essence of our daily lives However this interaction has not always been efficient or easy and has at times turned fairly hazardous **Coping with Complexity** Janet Andrea Weiss, 1977 **Coping with Complexity** Gerry Quinn, 2022
