Aging Reproductive System:

The Aging Reproductive System Edward L. Schneider, 1978 Psychosocial aspects of reproductive aging Clinical aspects of aging of the female reproductive system Clinical aspects of aging of the male reproductive system Effect of aging of the ovaries and female gametes on reproductive capacity The aging uterus and fallopian tubes Aging of the male sex accessory organs Aging effects on the hypothalamic-pituitary-gonadal control system in the rat Reproductive senescence in rodents factors in the decline of fertility and loss of regular estrous cycles Recent studies on neuroendocrine control of reproductive senescence in rats An effect of reproductive aging increased risk of genetically abnormal offspring **Aging, Reproduction, and the Climacteric** Luigi Mastroianni Jr., C. Alvin Paulsen, 2012-03-19 Interest in sexuality and reproductive function does not cease when people begin to age Instead a new set of questions arises Women want to know if it is safe to have babies in their late thirties and early forties They want to know more about hot flashes and other symptoms of menopause which ones are dangerous and which are merely uncomfortable They are eager to learn about the relative risks and benefits of estrogen replacement therapy Men too are concerned about age related changes in their sexual function Experts in reproductive physiology gerontology and genetics met at the National Institutes of Health in June of 1984 to discuss these and other concerns about aging and the reproductive system The conference on Aging Reproduction and the Climacteric was sponsored by the American Fertility Society The National Institute on Aging and the National Institute of Child Health and Human Development This volume is based on the proceedings of that conference **Textbook of Men's Health and Aging, Second Edition** Bruno Lunenfeld, Louis J. G. Gooren, Alvaro Morales, John Morley, 2007-12-20 The first edition of Textbook of Men's Health did much to establish and define the scope of the emerging subspecialty of aging men's health This revised and updated edition with new sections on basic sciences and sexual dysfunction has a small but significant change of approach reflected in the new title The central mission of the new edition **Functional Neurobiology of Aging** Patrick R. Hof, Charles V. Mobbs, 2001-01-11 Some well known age related neurological diseases include Parkinson's disease Alzheimer's disease deafness and blindness Even more common are the problems of aging which are not due to disease but to more subtle impairments in neurobiological systems including impairments in vision memory loss muscle weakening and loss of reproductive functions changes in body weight and sleeplessness As the average age of our society increases diseases of aging continue to become more common and conditions associated with aging need more attention by doctors and researchers In 1991 patients over the age of 65 saw their doctors an average of eight times per year Research funding is provided by the Neuroscience and Neuropsychology of Aging NNA Program which is run by the National Institute on Aging This book offers a comprehensive overview of all topics related to functional impairments which are related to the aging brain and nervous system It is organized according to four general functions movement senses memory and neuroendocrine regulation Written by the leading researchers in the field this comprehensive work addresses both

impairments associated with diseases and not associated with diseases making it easier to understand the mechanisms involved Functional Neurobiology of Aging is an important reference for professionals and students involved in aging research as well as physicians who need to recognize and understand age related impairments Organized by function making it easy to find and understand the material Addresses impairments both associated with diseases and not associated with diseases Written by leading researchers in the field Most comprehensive source of information on the neurobiology of aging

Hormones in Ageing and Longevity Suresh Rattan,Ramesh Sharma,2017-08-19 This multi chapter book focuses on one of the hottest topics in ageing research the role of hormones in health and longevity offering a comprehensive and up to date overview of their mechanistic roles in health ageing and longevity Hormones are an excellent system of communication between cells and tissues within an organism and they coordinate a wide range of processes in biological systems including neuroendocrine and immunological controls The book offers insights into the latest significant advances in our understanding of the mechanisms of hormonal signaling that control a variety of processes involved in development and ageing It is divided into four parts Part I includes a review of the hundred year history of hormones by the illustrious hormone biochemist Dr J R Tata Part II presents various chapters on the hormones involved in growth stress and metabolism while Part III addresses the hormones controlling cognition and rhythms in ageing processes Lastly Part IV discusses the hormones affecting reproduction immunity and life span It also explores the use of hormones as pharmaceuticals to maintain health in the elderly It is a valuable resource for those working in the area of hormone signaling in general and in the field of ageing research in particular
