Cognitive Task Analysis (l'Analyse Des Taches Cognitives). ,2000 Cognitive task analysis is defined as the extension of traditional task analysis techniques to yield information about the knowledge thought processes and goal structures that underlie observable task performance Cognitive task analyses are conducted for a wide variety of purposes including the design of computer systems to support human work the development of training and the development of tests to certify competence As part of its Programme of Work NATO Research Study Group 27 on Cognitive Task Analysis has undertaken the task of reviewing existing cognitive task analysis techniques The Group concludes that few integrated methods exist that little attention is being paid to the conditions under which methods are appropriate and that often it is unclear how the products of cognitive task analysis should be used RSG 27 has also organized a workshop with experts in the field of cognitive task analysis The most important issues that were discussed during the workshop were 1 the use of CTA in the design of new systems 2 the question when to use what technique and 3 the role of CTA in system design RSG 27 emphasizes 1 that is important for the CTA community to be able to empirically demonstrate the added value of a CTA 2 it is critical for the success of CTA to be involved in the design process from the start

to finish and to establish clear links with methods that are used by other disciplines and 3 recommends that more research effort be directed to the issue of the reliability of CTA techniques *Methods for Conducting Cognitive Task Analysis for a Decision Making Task* , Protocols for Cognitive Task Analysis ,2005 The purpose of this Report to lay out guidance including sample forms and instructions for conducting a variety of Cognitive Task Analysis and Cognitive Field Research methods including both knowledge elicitation and knowledge modeling procedures that have a proven track record of utility in service of both expertise studies and the design of new technologies Our presentation of guidance includes protocol notes These are ideas lessons learned and cautionary tales for the researcher We also present Templates prepared forms for various tasks We describe methods useful in bootstrapping which involves learning about the domain and the needs of the clients We describe methods used in proficiency scaling and procedures for modeling knowledge and reasoning We describe methods coming from the academic laboratory e g Protocol Analysis methods coming from applied research e g the Critical Decision Method and methods coming from Cognitive Anthropology e g Workpatterns Observations We also describe methods coming from Human Factors Psychology the Critical Decision Method and Goal Directed Task Analysis Along the way we present lessons learned and rules of thumb that arose in the course of conducting of a number of projects both small scale and large scale The guidance offered here spans the entire gamut going all the way from general advice about records keeping to detailed advice about audio recording knowledge elicitation interviews going all the way from general issues involved in protocol analysis to detailed advice about the problems and obstacles involved in managing large numbers of multi media resources for knowledge models

Due to the requirements of automatic system design and new needs for the training of complex tasks Cognitive Task Analysis CTA has been used with increasing frequency in recent years by the airline industry and air traffic control community Its power is reflected in the literature on professional training and systems design where CTA is often cited as one of the most promising new technologies especially for the complex cognitive tasks now confronting those working in aviation The objective of this book is to bridge the gap between research and practice to make what we know about CTA available to practitioners in the field The book focuses on cognitive psychology and artificial intelligence analyses of aviation tasks It is designed to help readers identify and solve specific design and training problems in the flight deck air traffic control and operations contexts Distilling experience and guidelines from the best aviation cognitive analyses in accessible form it is the first comprehensive volume on CTA and is written for practitioners of cognitive analysis in aviation It provides an overview of analyses to date methods of data collection and recommendations for designing and conducting CTA for use in instructional design systems development and evaluation The first part of the book provides the principles and foundations of CTA describing traditional approaches to task analysis and ways that cognitive analyses can be integrated with the analysis and development processes The next part details how to select the appropriate method or methods determine job tasks that can be trained for automatic performance extract knowledge structures analyse mental models and identify the decision making and problem solving strategies associated with experienced job performance The authors also describe when to use and how to design and conduct a cognitive task analysis how to use CTA along with traditional task analysis and ISD and how to use CTA in training program development and systems design as well as in personnel selection and evaluation The current demand for cognitive analyses makes this a timely volume for those in aviation and more generally the industrial development and training communities Readers will find this a thorough presentation of cognitive analyses in aviation and a highly usable guide in the design implementation and interpretation of CTA The book will be useful to instructional developers aviation equipment and systems designers researchers government regulatory personnel human resource managers instructors pilots air traffic controllers and operations staff *Applications of Cognitive Work Analysis* Ann M. Bisantz, Catherine M. Burns, 2016-04-19 Despite continued interest in Cognitive Work Analysis CWA techniques for the analysis and design of complex human technology systems few published accounts exist that document all of the five recommended phases of CWA in real world applications Delineating a work centered conceptual framework that guides the design of technology Applications *Behavioral and Cognitive Task Analysis Integration For Assessing Individual and Team Work Activities* Teresa Brenner, Navy advancement center pensacola fl, 1998 Traditionally the same type of task analysis procedures has been used for all types of jobs Recent changes in the workplace include the increased focus on the cognitive

demands of tasks and the increased use of work teams to accomplish these tasks Researchers have discussed the implications of these trends for task analysis procedures in organizations today Cascio 1995 noted an organizational change away from task based work to more of a process Jobs are no longer defined by a limited number of tasks requiring the employee to accomplish a range of tasks that may change over time As a higher proportion of jobs are focusing on troubleshooting activities cognitive task analysis may be more appropriate for identifying strategies involved in effective performance
