*An Introduction to Network Programming with Java* Jan Graba, 2003

With the explosion in growth of the internet and the increasing use of intranets across a wide spectrum of business areas

there has been a correspondingly large growth of interest in network programming particularly in the use of client server applications Java's inbuilt network programming capabilities and its platform independence have made it a natural choice for network applications and it has quite rightly been referred to as the language of the internet Exceptionally difficult and fraught with pitfalls in most languages the programming of network applications is greatly eased by the use of Java libraries An Introduction to Network Programming using Java is a streamlined text that provides clear guidance on all essential aspects of network programming that might be expected to appear on the syllabus of an undergraduate module in this area Areas covered include file handling JDBC servlets JavaBeans and Java Server Pages Programming Web Components Reaz Hoque, Tarun Sharma, 1998 This handbook shows developers how to integrate CORBA and COM components on the Web with Java Beans The title covers the latest technology including JDK 1.2 RMI CORBA and MIME The CD ROM contains custom Glasgow beans
