Contraception and Modern Ireland Laura Kelly, 2023-02-23 Contraception was the subject of intense controversy in twentieth century Ireland Banned in 1935 and stigmatised by the Catholic Church it was the focus of some of the most polarised debates before and after its legalisation in 1979 This is the first comprehensive dedicated history of contraception in Ireland from the establishment of the Irish Free State in 1922 to the 1990s Drawing on the experiences of Irish citizens through a wide range of archival sources and oral history Laura Kelly provides insights into the lived experiences of those negotiating family planning alongside the memories of activists who campaigned for and against legalisation She highlights the influence of the Catholic Church s teachings and legal structures on Irish life showing how for many sex and contraception were obscured by shame Yet in spite of these constraints many Irish women and men showed resistance in accessing contraceptive methods This title is also available as Open Access **How to Avoid Unplanned Pregnancy**

books on these two subjects This integration reflects the tendency to teach these two subjects together as behavioural science with an increased stress on the place of medicine in society and on illness as a product of psychological and social circumstances rather than merely a biological phenomenon The book reflects these trends and has been successful and popular with students An integrated treatment of psychology and sociology for medical students in line with the trend towards teaching these subjects as behavioural sciences Use of case studies and Stop Think boxes encourages critical thinking and discussion Graphic Illustrated Colour Text presentation style enlivens a subject which most medical students are not keen on This third edition contains a new introduction on the importance and key features of the biopsychosocial model and additional double page spreads on International Health and Rural Health **Everyone's Guide to Successful**
